# bluink

eID-Me and Azure AD B2C
Integration

Identity verification, proofing,
and digital identity platform
for user sign-up and sign-in.

- User sign-up with verified identity information in seconds using eID-Me.

- User sign-in with strong, password-free phone-as-a-token authentication using the eID-Me mobile app.

- Add custom policies to either workflow, including location-based login and verified address-based sign-up, or create your own policies to meet your needs.
