Create 3D models *at scale*, without ever sacrificing quality

Description:
Convert as little as a single image into a high-fidelity 3D model for any use case

Input data:
Images, scans or CADs

Output data:
Hyper realistic 3D model

Creation time:
30 min – 3 days

Live Link

Visualize products
inside customers' homes

Description:
One of the most advance visualizations
methods to date proven to increase purchase
intent and lower returns.

Computability:
Any device and OS.

Key features:
Animation
QR and desktop support
Multiple 3D models manipulation in a single file

Live Link

Manage 3D content to support any use case

Description:
Ingest, optimize and standardize 3D models to support any use case

Key features:

Automated QA

Product request & search API

3D model conversion

3D model optimization

3D model standardization

Reduce your *carbon footprint* by digitizing the photoshoot process

Description:
Use your 3D models to reduce visualization costs while replacing pollutive real life photoshoot
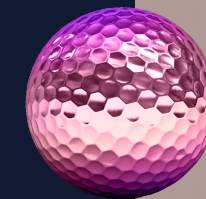

Input data:
3D models

Output:
High fidelity 2D product renders

**Creation time:**
1–7 days

Leverage *TikTok's* Virtual Try-On Experiences

Description:
Integrate BytePlus cutting-edge VTO technology into your online store using Hexa's 3D tech stack.

Experience is supported on all OS and devices

Expand customer *engagement* with immersive virtual stores

Description:
Use your 3D models to reduce visualization costs while replacing pollutive real life photoshoot
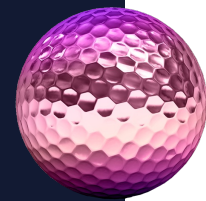

Input data:
3D models

Output:
High fidelity 2D product renders

Creation time:
1–7 days

Expand *visual engagement* by digitizing video production

○─────────○

Description:
Use your 3D models to reduce visualization costs while replacing pollutive real life photoshoot
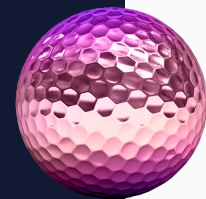

Input data:
3D models

Output:
High fidelity 2D product renders

Creation time:
1–7 days
