Explore untapped business value using the ‘Generative AI’ solutions from Microsoft

Free ‘Think Starter’ Workshop

What analysts are saying:

As per **Gartner**, by 2025, Generative AI will generate 10% of new Data.

Similarly, as per **Forbes**, Generative AI can generate business worth \$109 billion by 2030.

Customer Challenges

Generative AI Technology can have unprecedented business impact. It can transform work and reinvent businesses.

Still, organizations may be unaware of the business use cases that can give them the best ROI from Generative AI. Also, Organizations are concerned about data privacy as a roadblock to innovation using Generative AI. There are ethical and legal concerns, such as those related to bias, or concerns such as Intellectual Property rights.

What We Offer

Join us for our Free, 3-Hour ‘Think-Starter’ workshop designed to introduce you to Microsoft Generative AI solutions - the cutting-edge technology in the industry. Our expert presenters will take you on a journey through the technology, its features, and its capabilities, providing a deep understanding of how it can benefit your business. The workshop is designed to build interest and equip you with a deeper exploration of the technology and its potential impact on your business.
