iT1 Source

Think Globally. Architect Locally.

iT1 Cloud Adoption Methodology

01/ Define Strategy

Understand core business objectives, technical outcomes, and financial outcomes.

02/ Plan & Prepare

Find the right operating model and recommend an actionable plan to migrate.

03/ Innovate

Build, measure, learn, and drive business value from the technology.
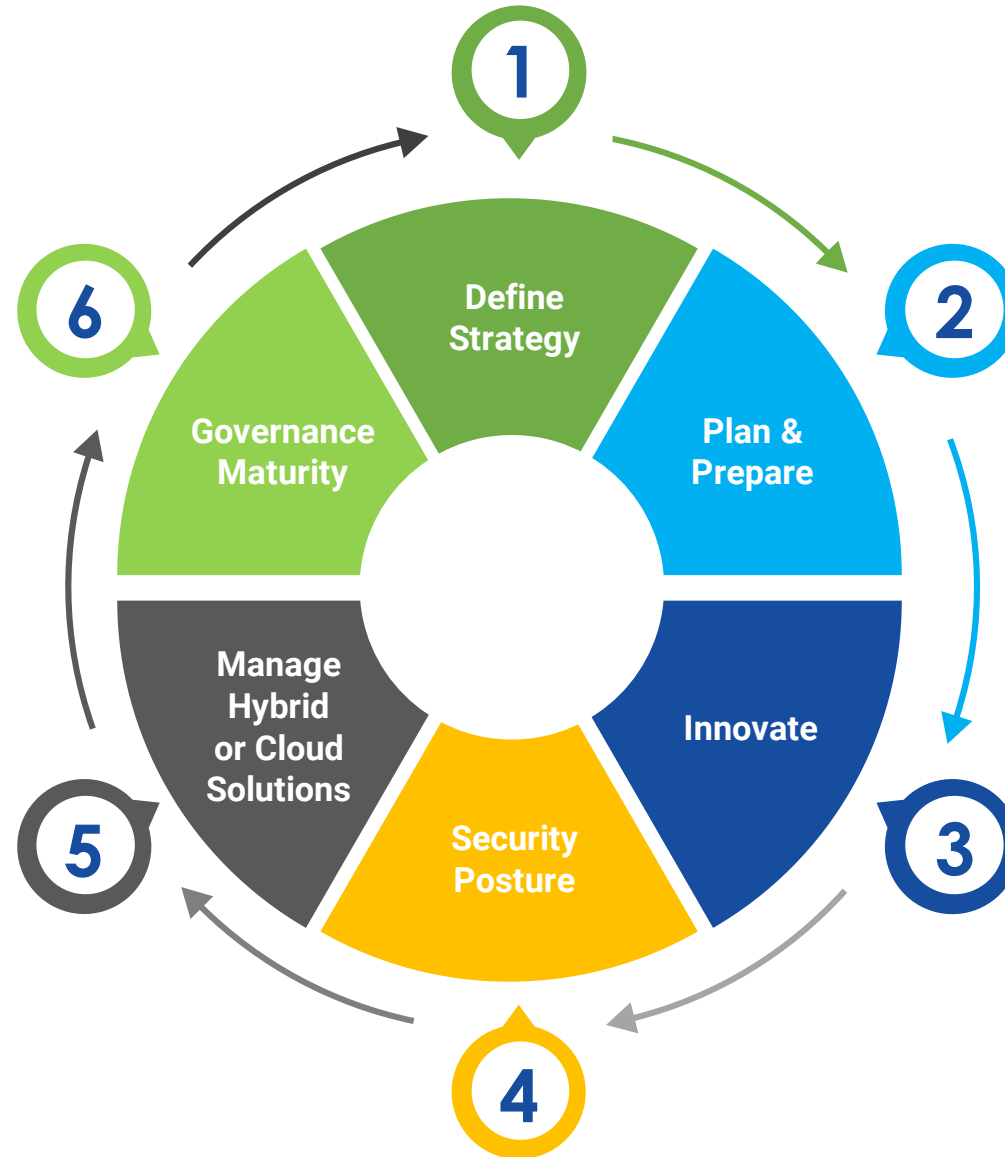

04/ Security

Provide guidance around evergreen security transformation.

05/ Manage

Define business commitments, operational compliance, and establish an ongoing management baseline to achieve tangible results.

06/ Governance

Assess current state of existing policies and recommend future state foundation and implement disciplines.

Circular diagram segments: Define Strategy (1), Plan & Prepare (2), Innovate (3), Security Posture (4), Manage Hybrid or Cloud Solutions (5), Governance Maturity (6)

iT1 Cloud Adoption Methodology

Strategy

- Improve business agility
- Reduce costs
- Accelerate time to market
- Enable expansion into new markets

Manage

- Ongoing operational transformation
- Criticality classifications
- Cloud management tools and processes

.

Plan & Prepare

- Best practices
- Organizational alignment to drive seamless adoption and training
- Assess workloads and validate technical readiness

Security

- Incremental progress and maturity
- Risk insights
- Security integration
- Business resilience

Innovate

- Review, measure and adapt
- Process improvements

Governance

- Continued governance maturity plan
- Implement disciplines around cost management, security and identity, and deployment acceleration

.
