

Azure VMware Solution : 2-Hours Briefing

TCS is helping organizations take their businesses to the cloud. With our experience in digital transformations and our strong relation with Microsoft, we can help you confidently plan your cloud adoption journey.

One such key technology demanding attention is Microsoft's Azure VMware Solution (AVS) which helps organizations adopt the cloud quickly. There are many reasons companies might need to shift their current workload to the cloud. Transforming to AVS on Azure private cloud may be a helpful catalyst in transforming your organization to become an intelligent enterprise.

Let TCS' extensive experience in cloud transformation help your organization, powered by our cloud foundation framework and support in governance.

During our 2-hour briefing we will discuss the needs and triggers around your organization's shift to cloud. With the dialogue, we will suggest the best suitable path in digital transformation. We will discuss a tailored approach and method for the cloud transformation. Below is TCS' service portfolio which will be discussed during briefing session.

- 1) Consulting and Assessment Services (Migration Assessment & Migration Roadmap on AVS)
- 2) Design Services (Infra Sizing, Architecture Design)
- 3) Implementation Services (Infra build, AVS install and Migrate, Integration build with Azure Services)
- 4) Testing & Validation (Infrastructure, Integration, Performance)
- 5) Managed Services (AVS & Infra Support, AVS and Infra Monitoring, Optimization)

Our 2-hour briefing on AVS provides an adoption plan around AVS, a tailored technological landscape of AVS, and anticipated benefits of migration AVS & licensing costs.
