neos
whatever IT takes

Winning in the Cloud with Azure

Neos provides a full range of services using the Azure cloud platform and we help our customers to transform legacy IT infrastructure to gain competitive advantages. We help to unlock the benefits of the Azure cloud platform for applications and workloads by migrating them. To make our customers ready for the future we help them discover, plan, migrate and operate their IT applications in cloud.

Why Cloud

Workforce Productivity
Cloud services and automation capabilities help drive operational maintenance efficiency and increase developer productivity

Business Agility
Reduce your time- to-market, increase operational agility, and drive innovation

Operational Costs
Lower operational costs with the ability to match supply and demand and create operational transparency

Capital Cost Transformation
Convert Capital to Variable cost and eliminate maintenance and hardware refresh programs.

How we help you winning in the cloud

Neos keeps your operational cost in check:

- Optimize your Cloud spend.
- Ensure environments scale up and down according to demand.
- Automates all deployments and ensure they are only running when needed.
- Meet SLAs at a fraction of your internal cost.

Enables your business agility:

- Enable experimentation
- Provide hardened templates
- Scale our services based on your needs
- Ensure security and compliance of your workloads

Neos helps to automate your workforce:

- Automate repetitive IT tasks.
- Ensure availability and best performance.
- Keep environment secure and compliant.
- Optimizes IT workload architecture.

Your Azure migration journey

Cloud excellence – continuous improvement in the Cloud

Migration of your applications and workloads

Application discovery & dependency mapping

Readiness assessment – evaluating migration and building your business case

Who we are

Neos is a managed service provider with offices in Germany, Thailand and Slovakia. We concentrate in building customized digital platforms across all industries and our expertise in public cloud and our knowledge around migrating legacy IT to the cloud helps our customers to reduce the time to value and costs. Whatever IT takes.
