

W+ WORKPLACE
PLUS

Enterprise-Grade Hybrid Workplace Platform

Workplace Plus help companies to manage their people and office to be safer, more useful and ready to be Hybrid workplace.

Trusted by Top leading businesses over 200+ companies.

The Rise of The Hybrid Workplace

Companies around the world are adjusting their workplaces to be a **Hybrid workplace**, where employees can choose which days to work in the office and which days they prefer to work from home.

With this, workplace leaders are reevaluating their space, looking for ways to make it more flexible, efficient, and effective for employees when they are on-site.

Smart Locker for Flexible Space

W+ Mobile

Native Mobile App

Create Endless Opportunities with 3rd Party & API Integration

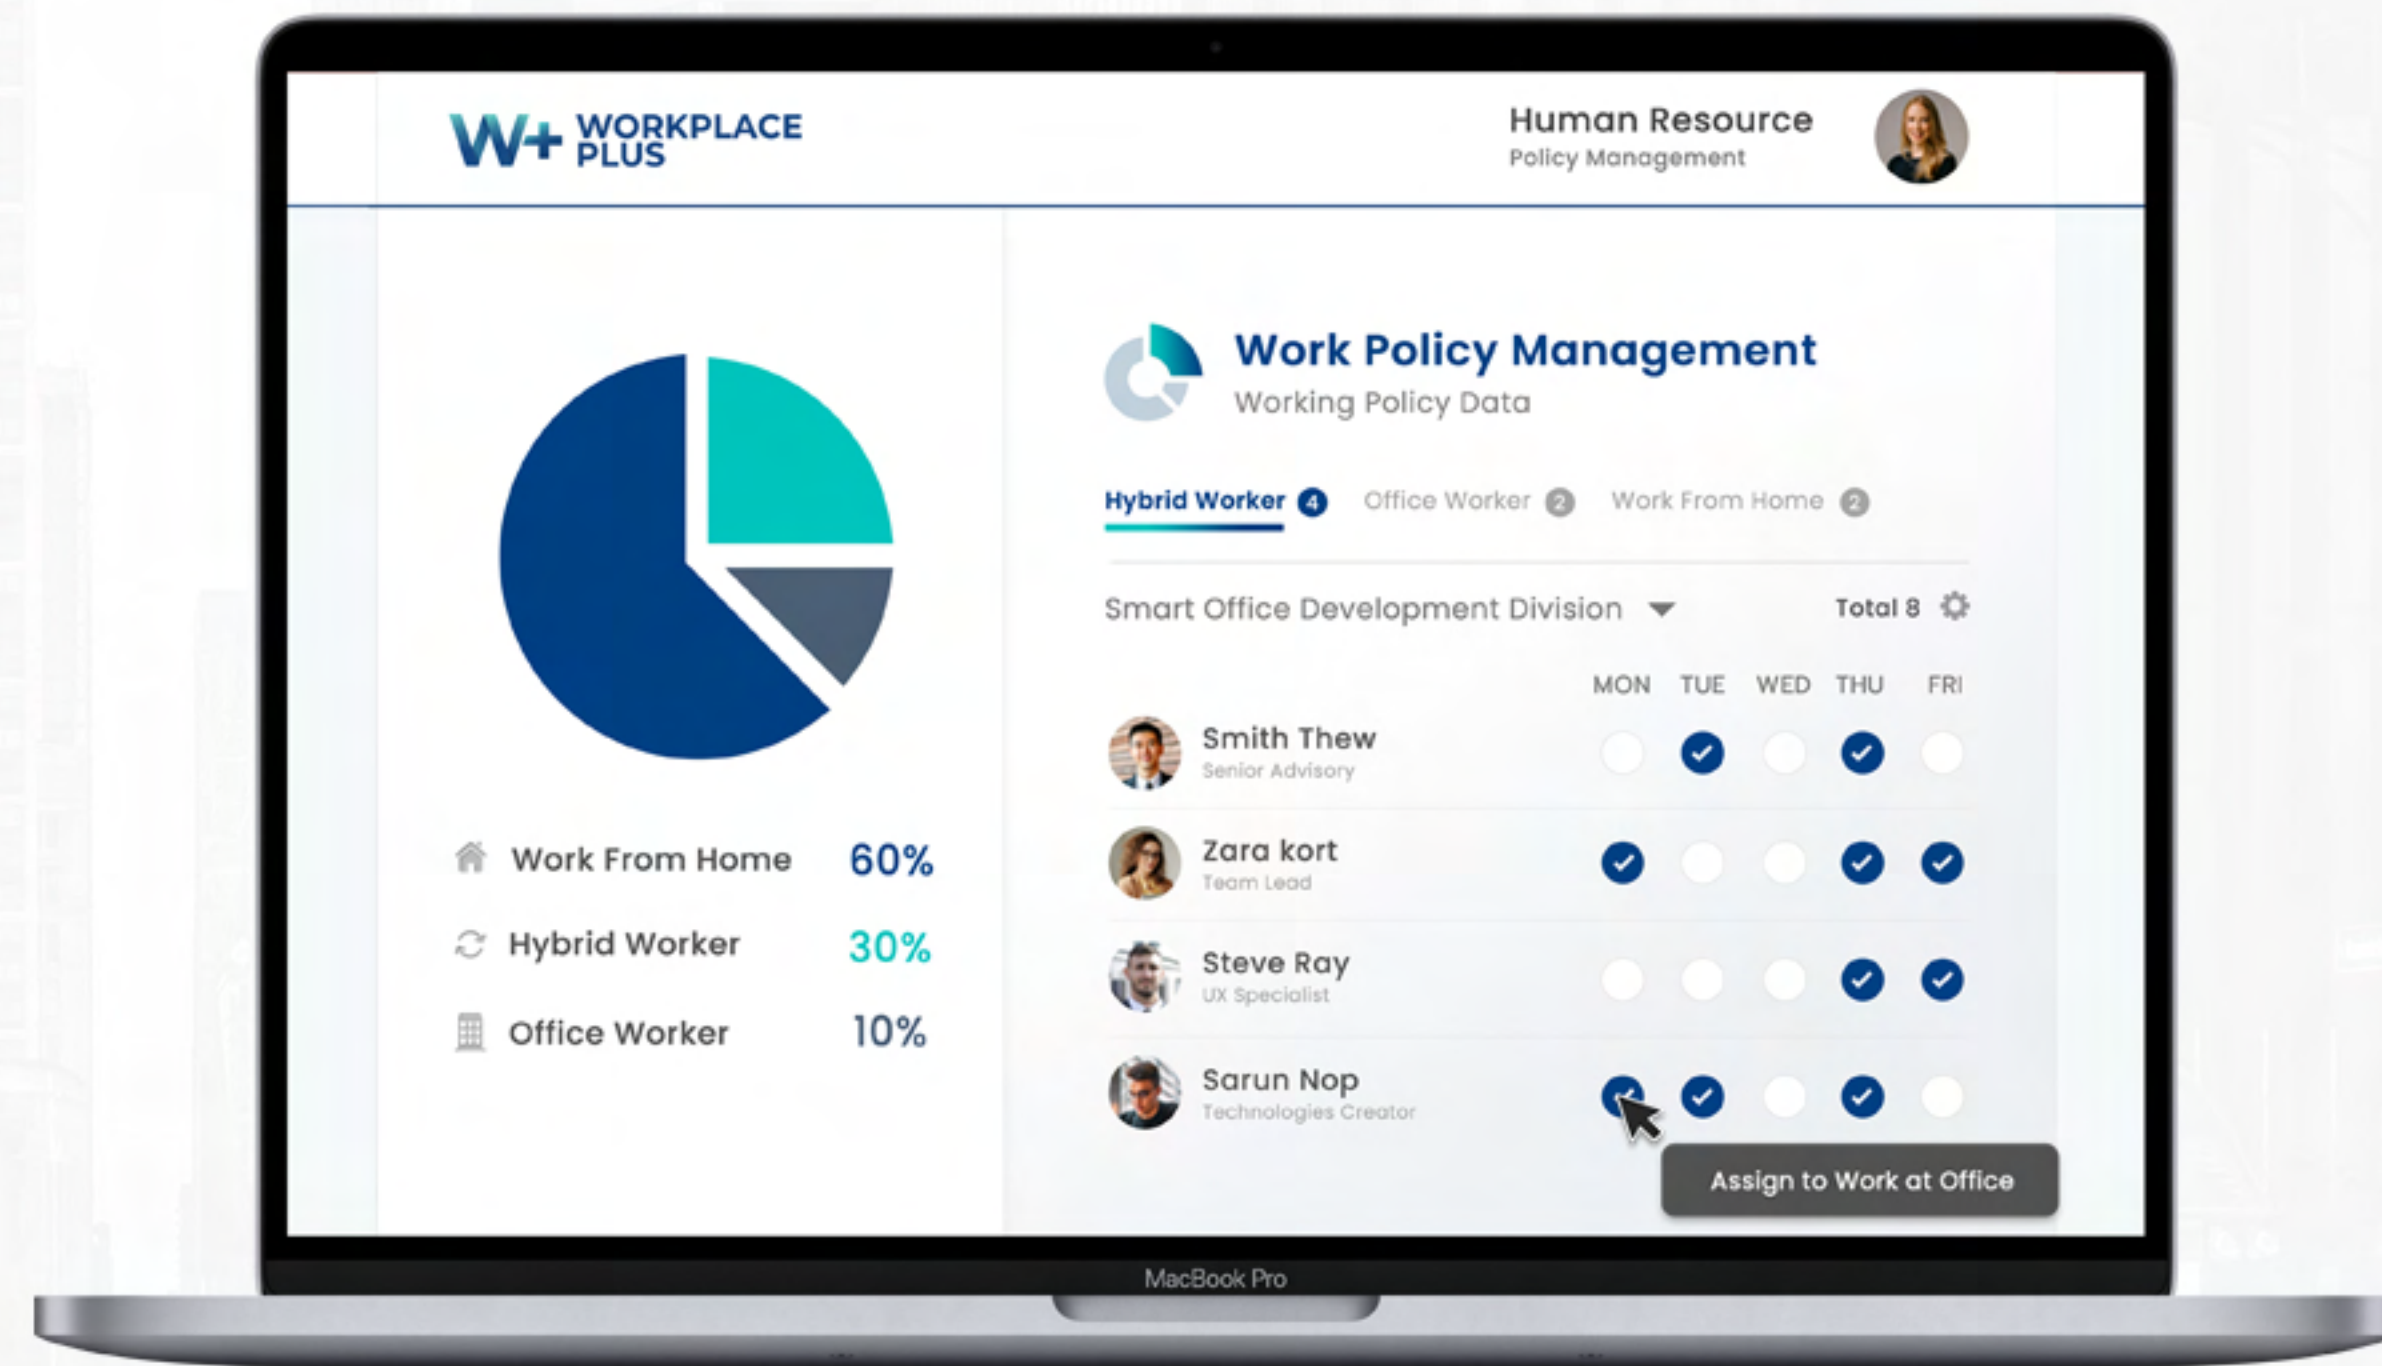

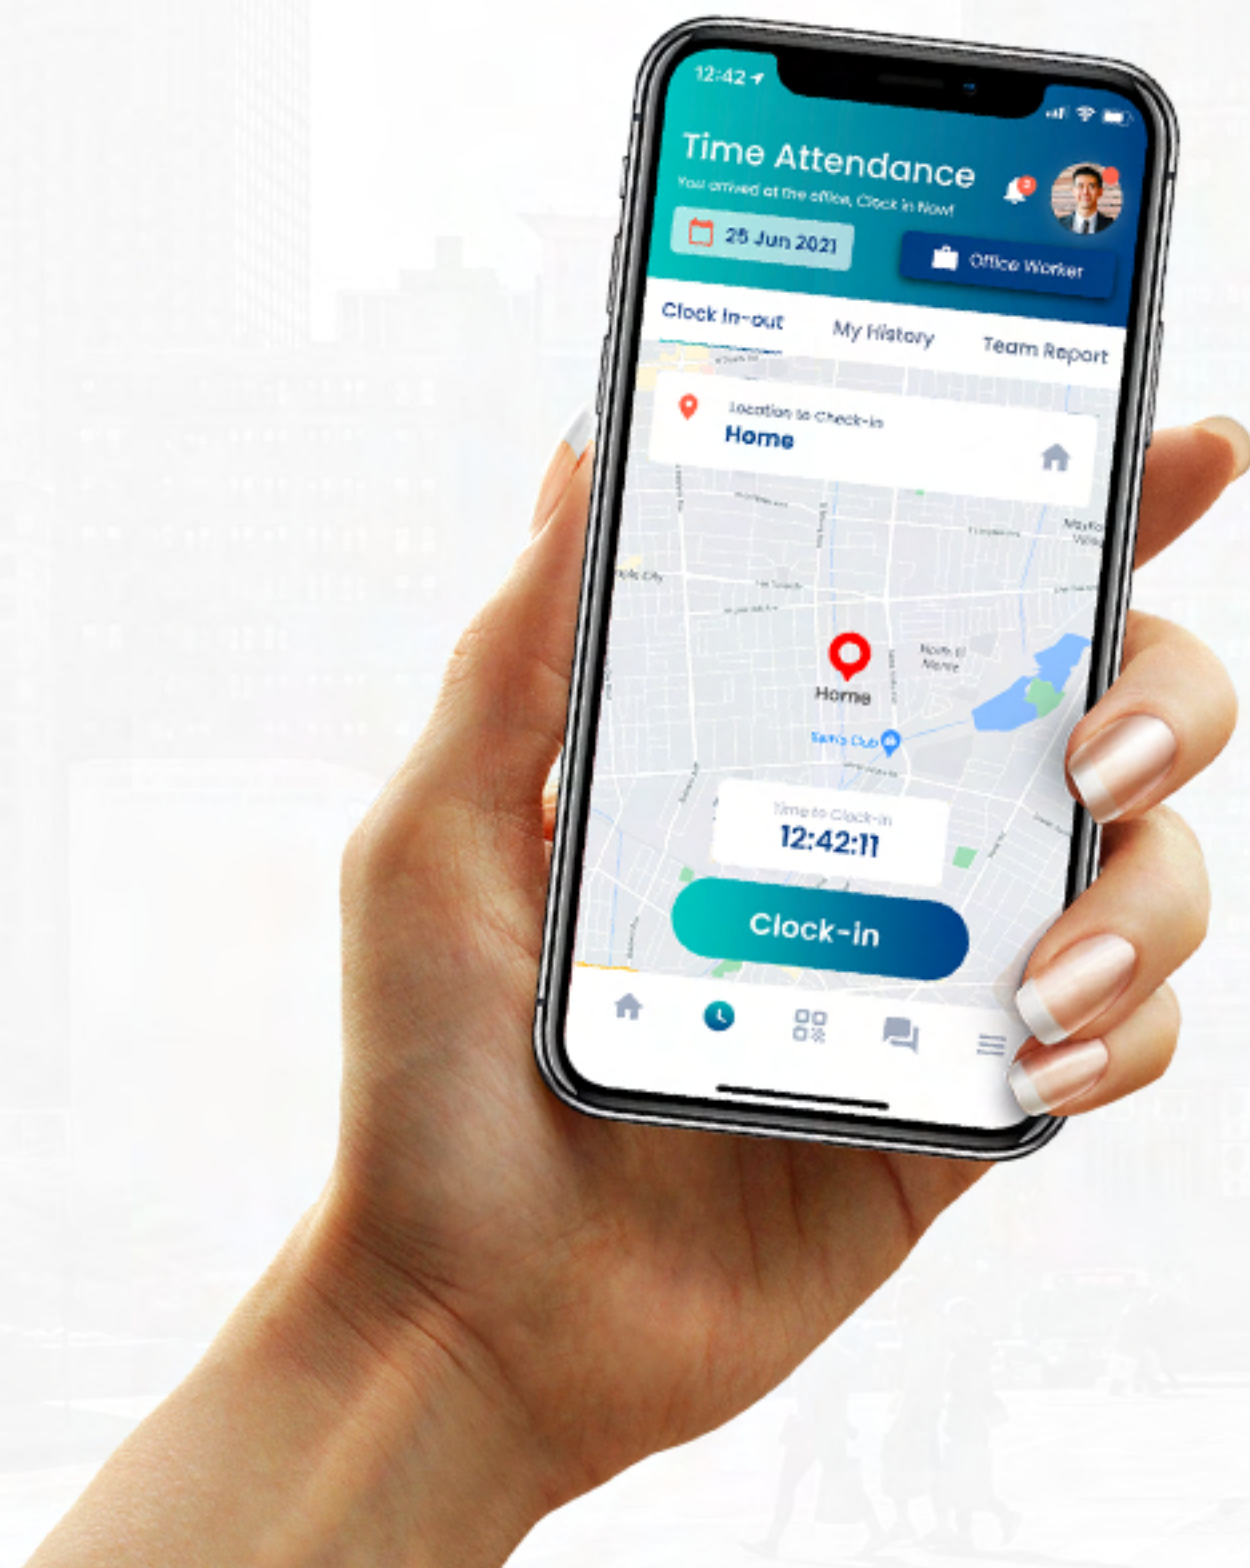

Workplace Plus Platform seamlessly sync with existing corporate platforms like Sync with your existing calendars Google Calendar, Office 365, Microsoft Exchange and MS Teams.

Manage users via MS AD, Azure AD, Single Sign-on or SAML 2.0 (like ADFS), and also Video conference platform such as Zoom, Teams.

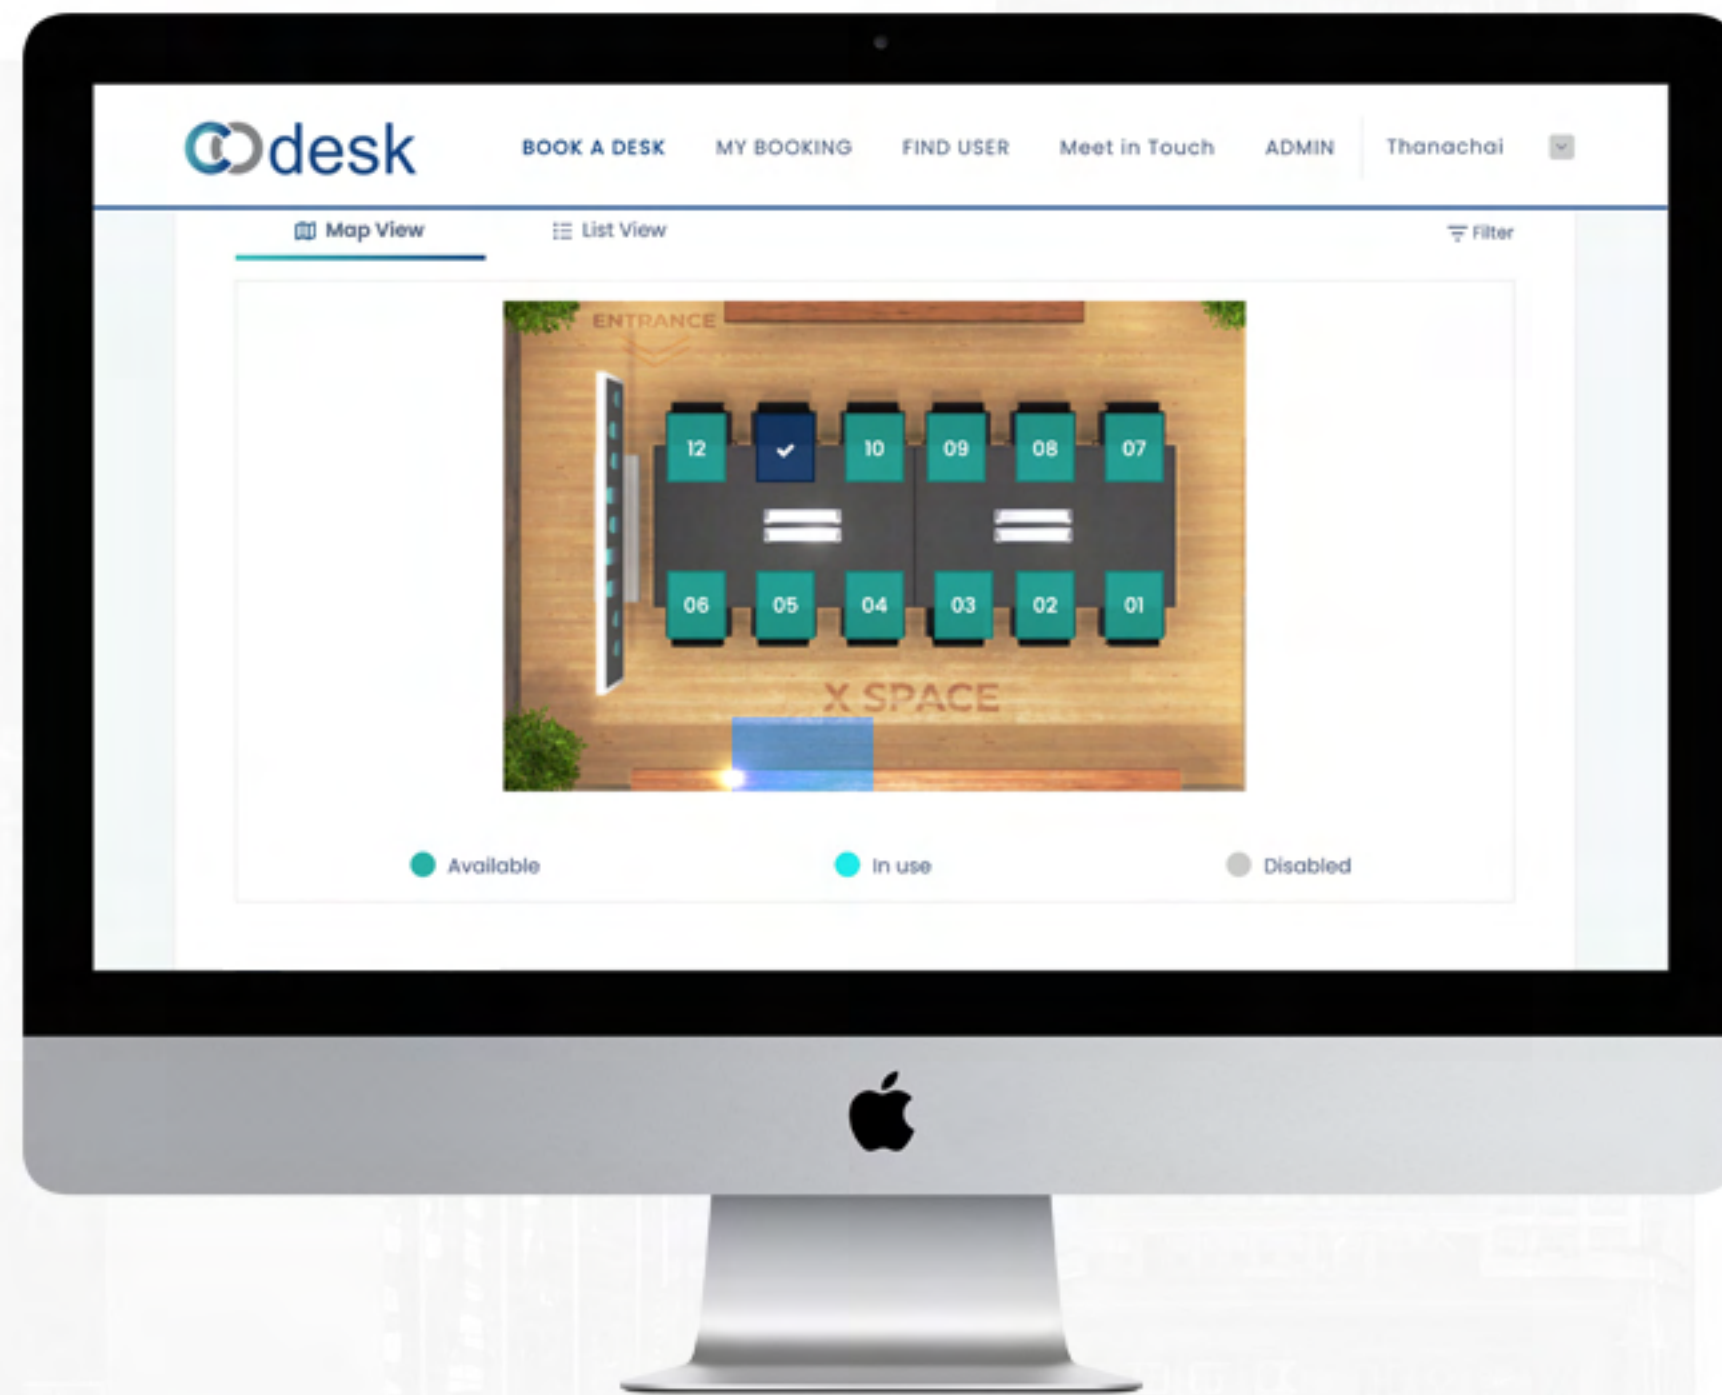

Create and Manage an Effective Flexible Working Policy

Employees easily see their schedule and plan to work based on their flexible policy. If they must work from home/Anywhere, they can open the app and Clock in to start working or they can reserve a desk/space on days they work in the office.

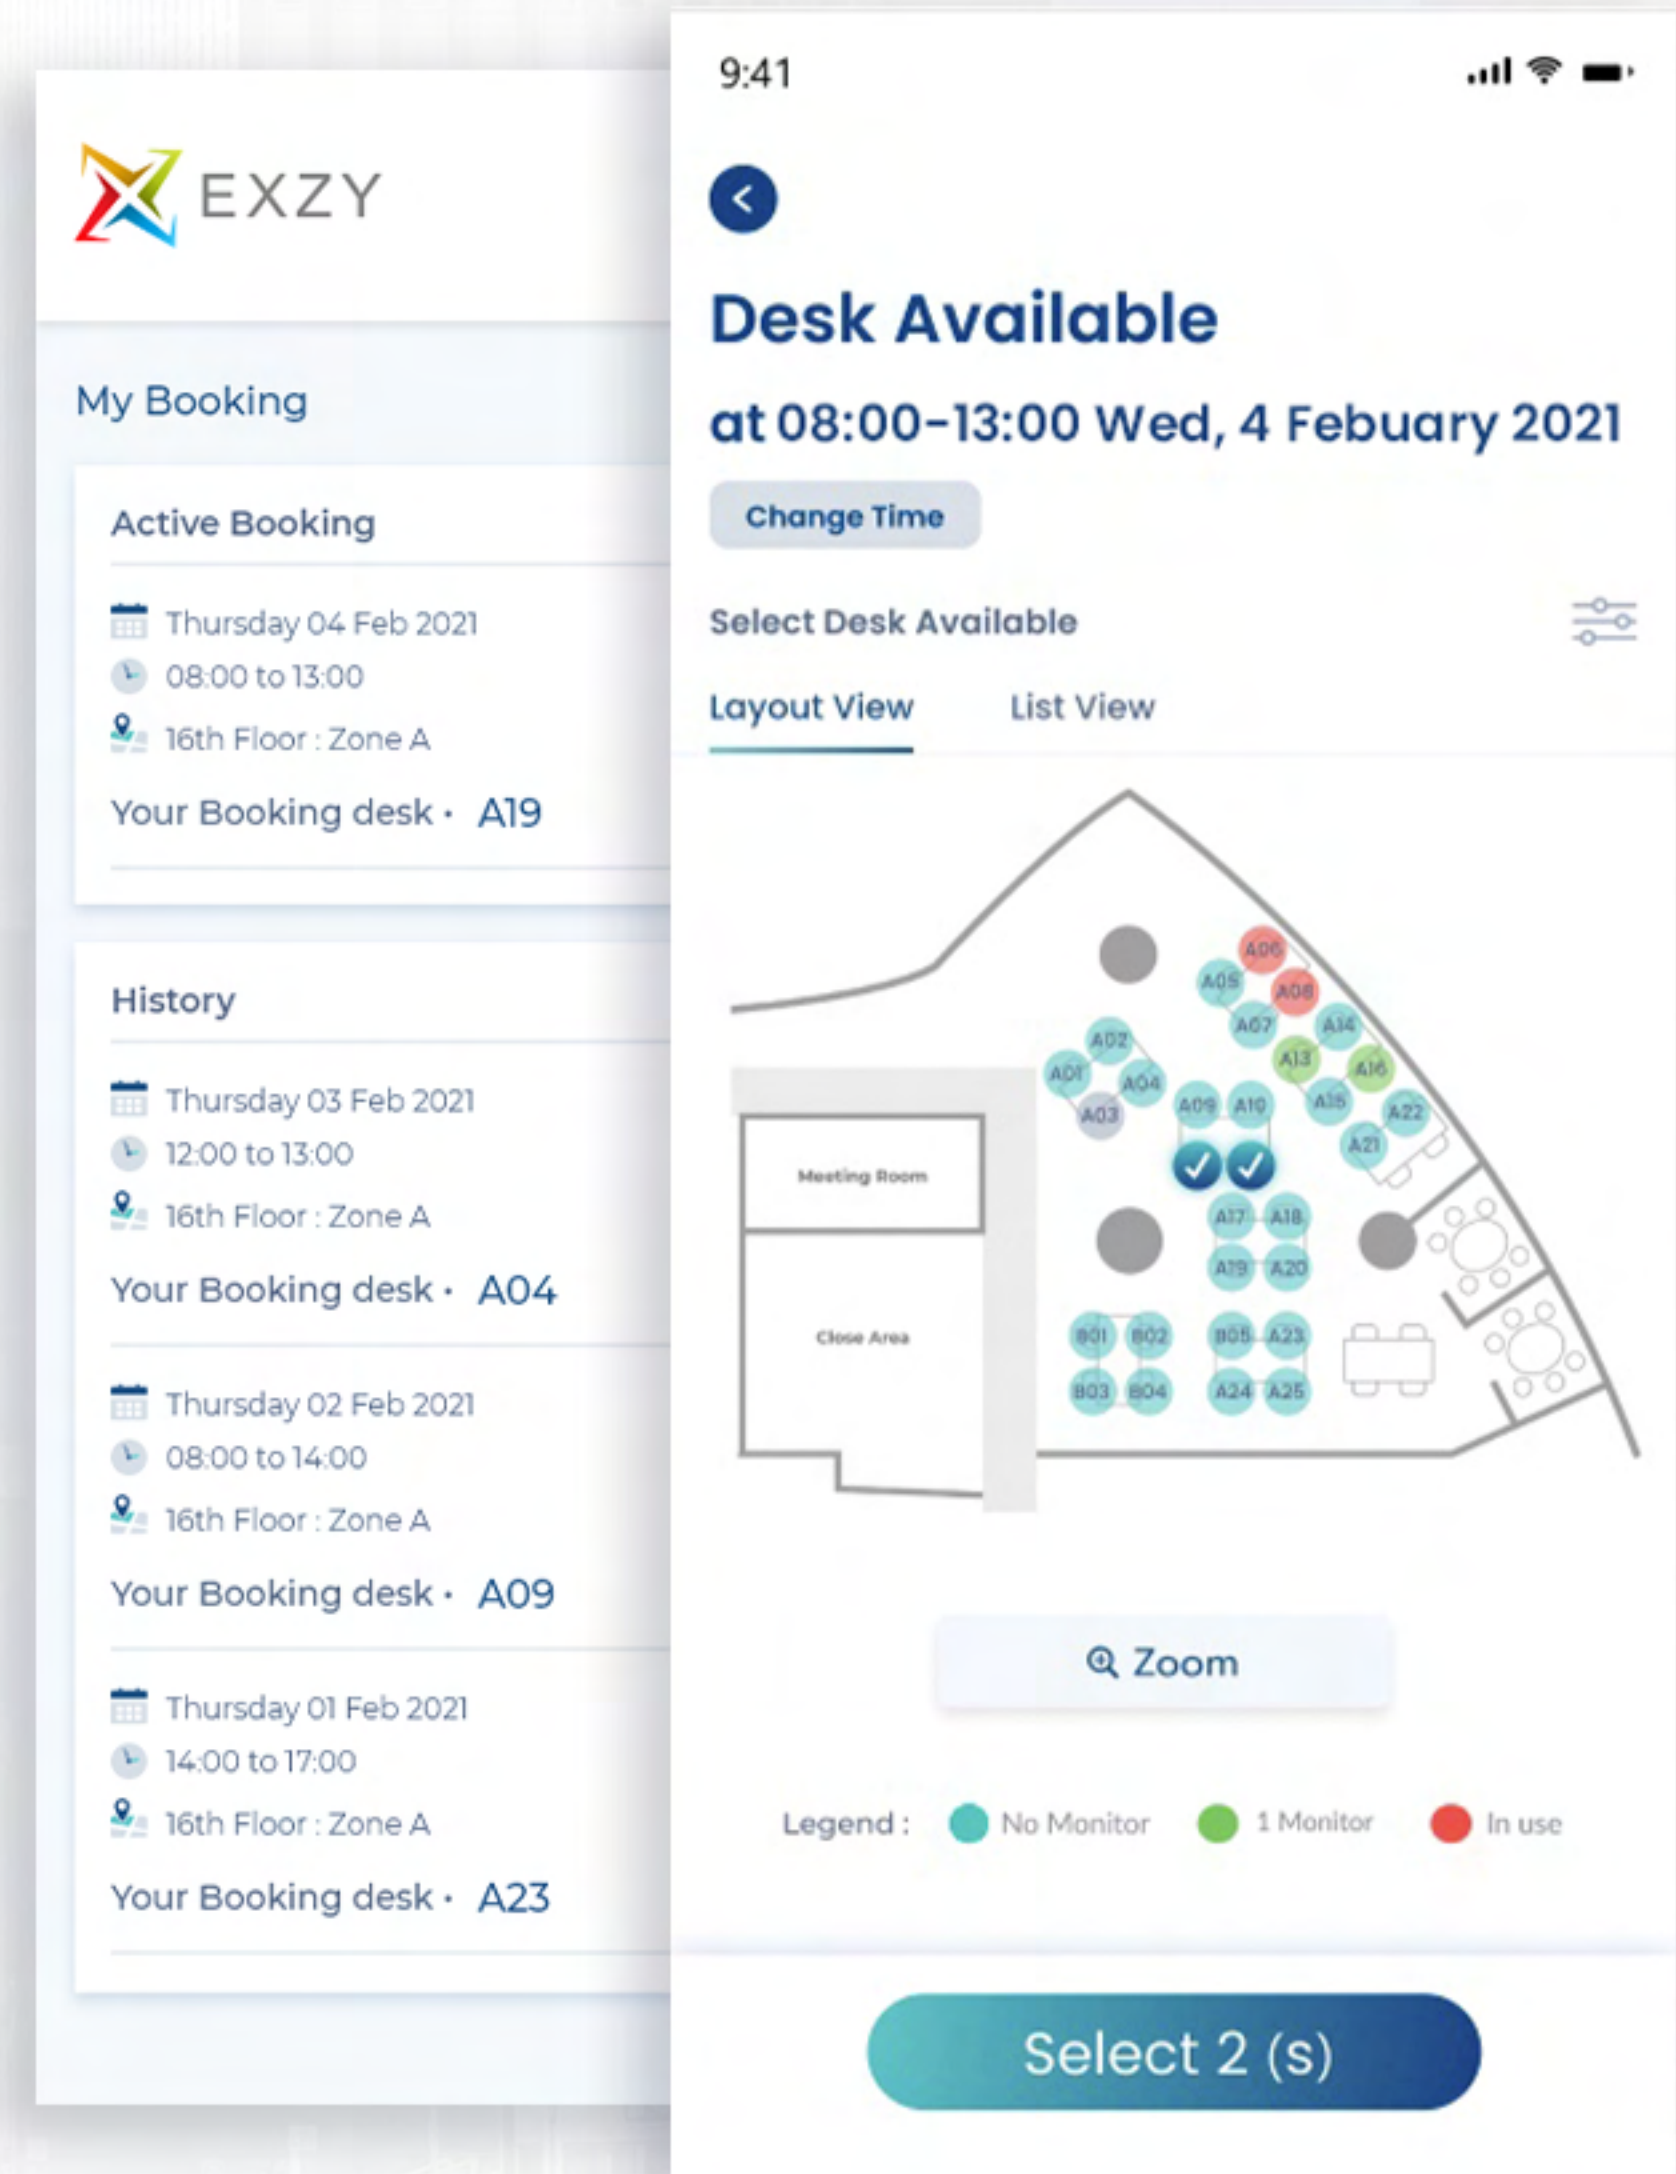

Adapt Your Space For Flexibility and Collaboration

Embracing a flexible workplace is easy with seamless desk sharing software. W+ Co Desk is designed to help you quickly set up desks to ensure social distancing in your office layout.

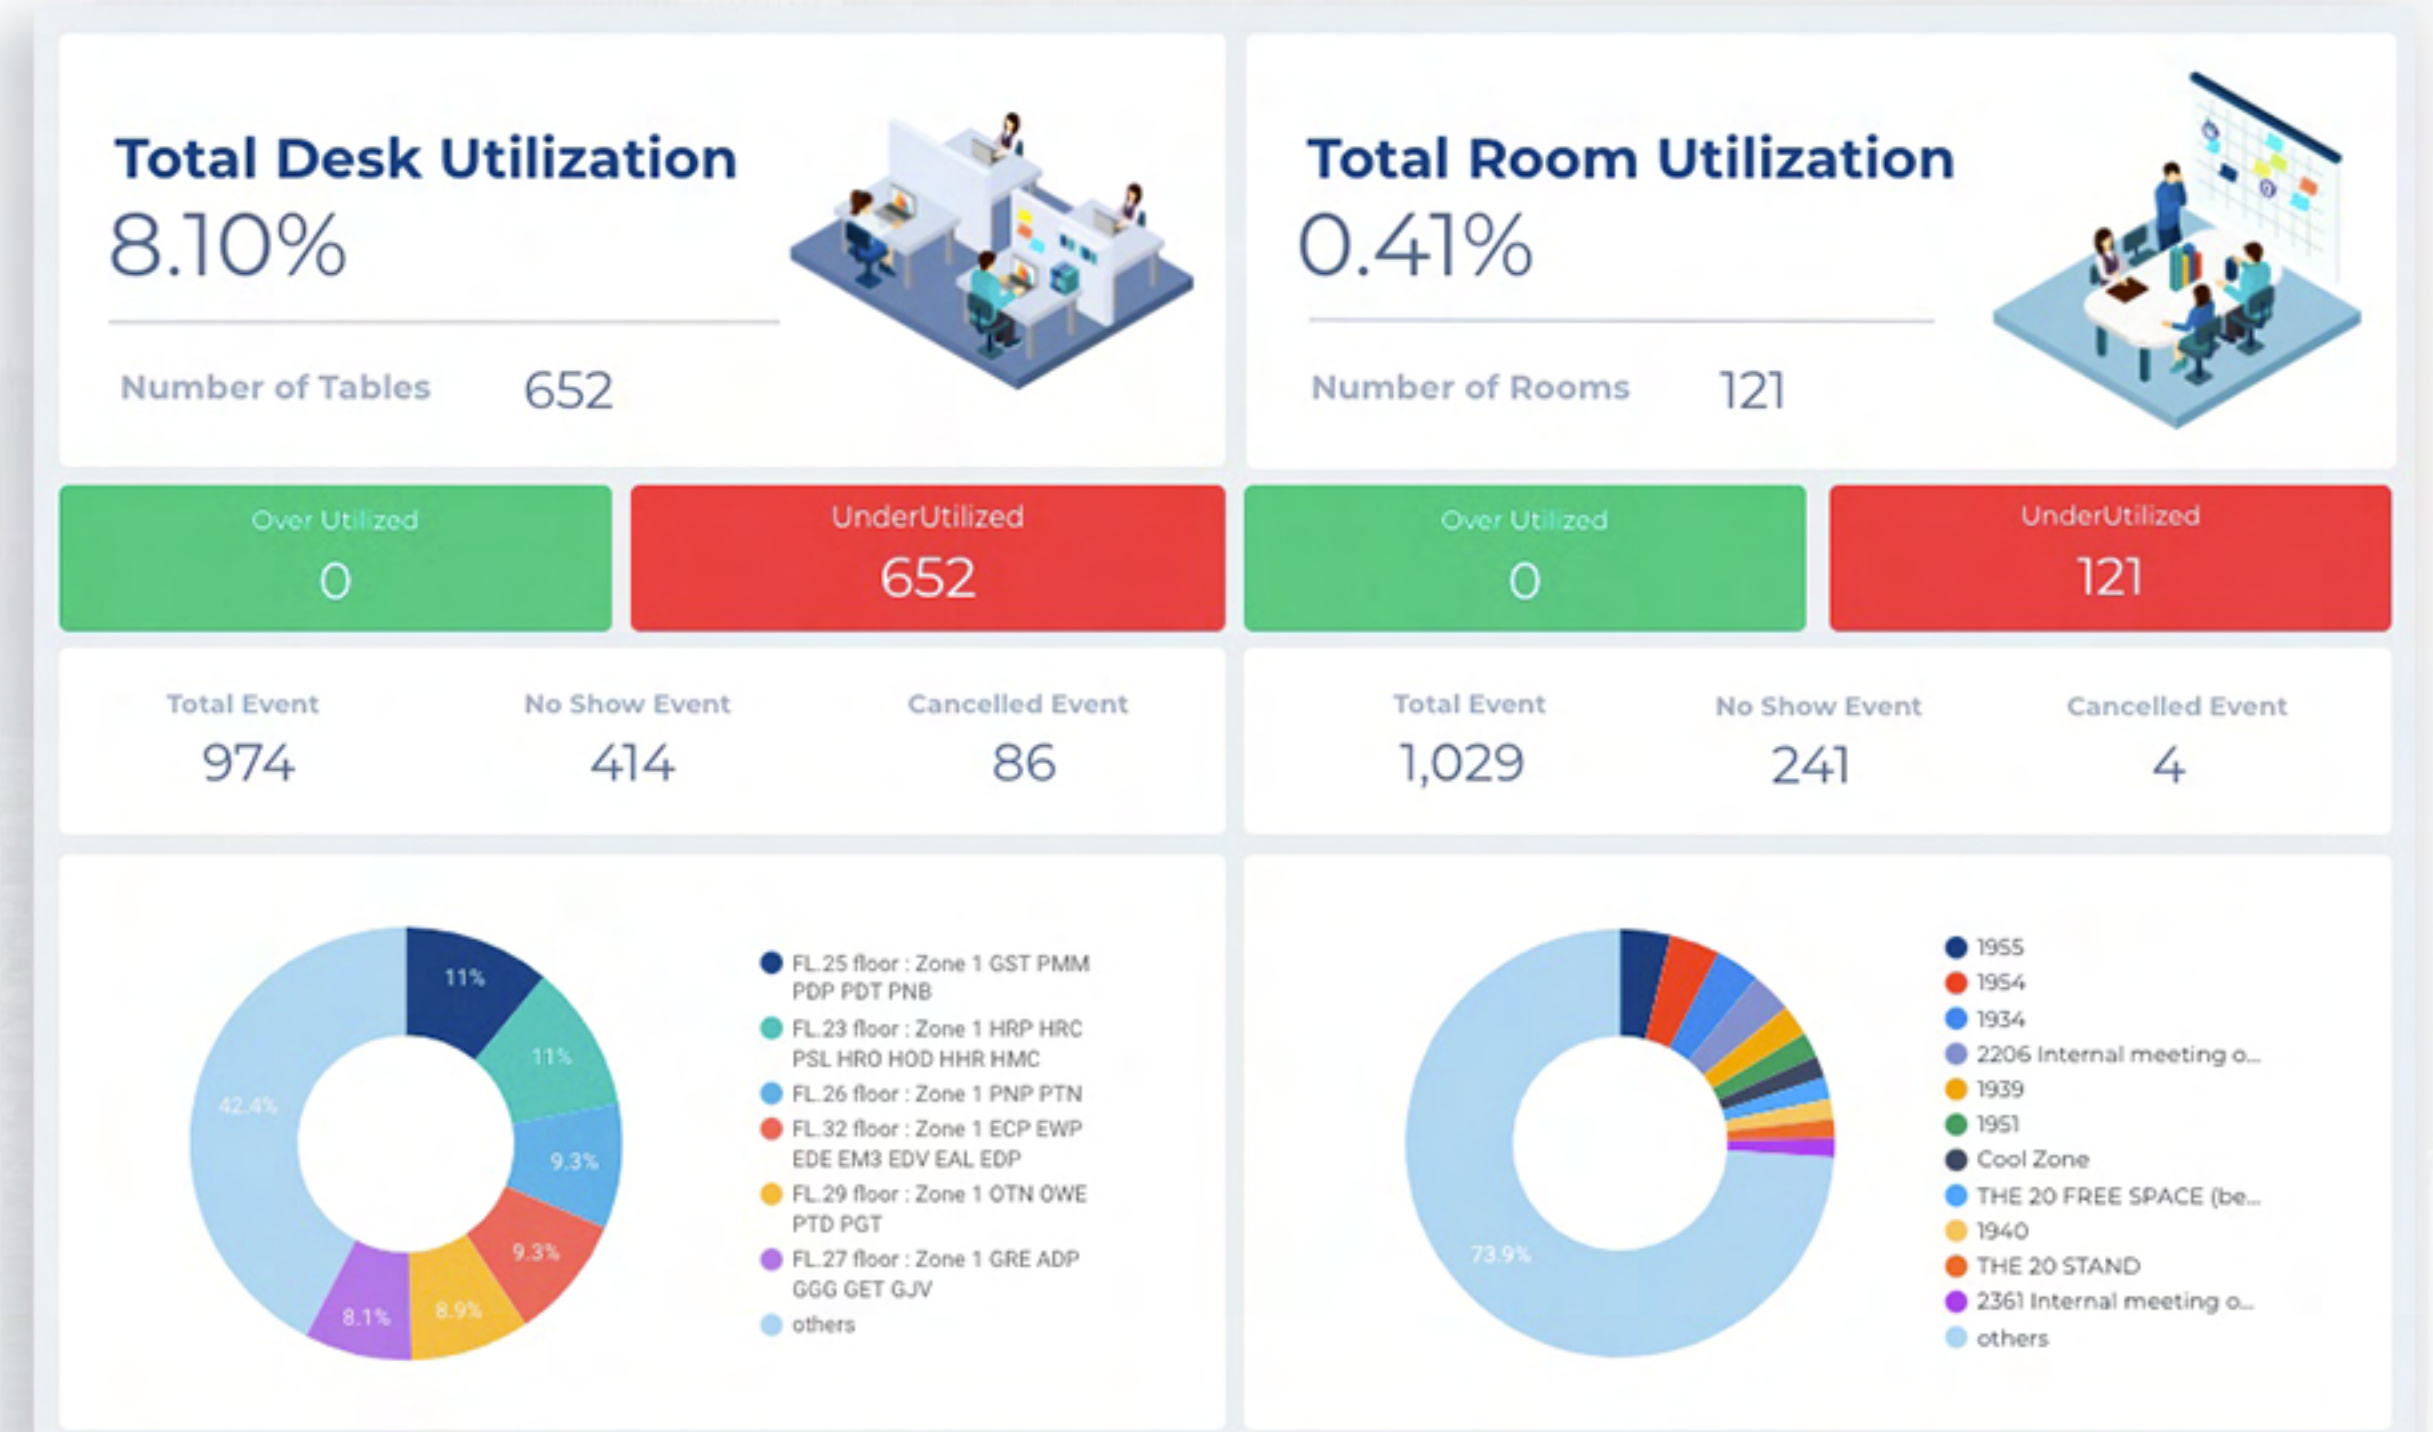

You determine which desks are available to book, permanently assigned, or unavailable so employees can maintain a safe distance on-site. Easily add or remove desk availability at each office location as your local ordinances or company policies change.

Advance Your Workplace with Analytics

Understanding how employees use your space will be vital in adapting to a flexible workplace. W+ CoDesk includes analytics that provide insights into how employees use each floor, neighborhood, and desk.

You can use analytics to know when you're running low on hot desks and need to add more. You can also use it when you test out a new configuration of desks to see if it's getting the usage you expect..

Ensure Only Healthy Employees Can Enter The Office

W+ Co Desk is an easy way for employees to reserve a desk on days when they are approved to work from the office. **W+ Access** (Dynamic Access Control) ensures that only employees who have passed your health questionnaire and booked a seat can access the area.

If an employee meets your criteria to work on-site, we'll automatically assign them a QR Code for the day when they sign-in at their workplace using the **W+** mobile app.
