Create connected workplaces & workforces – with Microsoft & ScreenCloud

Extend the reach and impact of Microsoft apps and content, from head office to plant floor.
Communication is at the heart of every organization’s success.

All companies go through digital transformation. At its center is improved information and data flow.
Screens are ubiquitous, yet underutilized.

- Screens should be a vital internal communications channel for businesses, especially for digitally detached deskless workers.
- But they are underutilized, often broken or just showing looping images & videos.
- This is partly due to the legacy of digital signage being the audiovisual industry - fragmented and hardware-first, and requiring an on-site IT presence.

- Communication could and should be improved effectively, cheaply and at scale with screens.
- Screens become a part of the fabric of an organization's working environment – visualizing operational data, health & safety updates, compliance, company & HR updates.
ScreenCloud improves digital employee experience by amplifying information and content from Microsoft applications, via ‘screens that communicate’.

Emails, verbal updates and static signage are not always reliable, cost-effective or scalable.

There is simply no other channel that can communicate to all employees as well as screens.

We enable customers to use the screens on their walls and the content in their systems – via our apps, integrations, and SaaS and technology partnerships – to create connected companies.

80% of the global workforce is deskless and digitally detached

84% of deskless workers feel that they do not get enough direct communication from management¹

83% of deskless employees don’t have a corporate email address and 45% have no access to a company intranet¹

This partnership ensures Microsoft content isn’t just seen, but felt, remembered and acted upon – as it’s presented on large digital displays in a visually appealing and dynamic format that is far more effective at communicating with digitally detached deskless workers than email, word of mouth or static signage.

Driving digital transformation and an improved digital EX with content from Microsoft apps on the big screen.

**ScreenCloud and Microsoft: We’re better together**

Together, ScreenCloud and Microsoft delivers frontline-first internal communication that can:

- Reach everyone in the entire organization, including digitally detached workers on the frontline, or not sat behind a desk
- Bridge the gap between knowledge and deskless workers, and head office/corporate and the frontline
- Drive engagement, productivity and operational efficiencies
- Extend the reach and impact of M365 apps and content
About ScreenCloud

The market-leading digital signage company

- 9000+ happy customers
- 100,000+ screens powered
- 5 hubs with 100+ employees

The best digital signage out there!

⭐⭐⭐⭐⭐ 05/17/2022

"All of the available apps that can be used!"

ScreenCloud

Charlotte, London, Belfast, Los Angeles, Bangkok
3 powerful ScreenCloud digital signage solutions that bridge the gap between management and deskless workers – through M365

**ScreenCloud PowerBI App**
Empower your frontline workforce with the data and insights needed to improve business outcomes and enhance productivity.

**ScreenCloud Post to Screen**
Keep every employee, from head office to plant floor, informed and up to date by sharing your latest MS Teams posts to the big screen.

**ScreenCloud Viva Engage**
Increase employee wellbeing and retention by recognizing deskless and frontline worker contributions, and building community.
INCREASE PRODUCTIVITY

ScreenCloud PowerBI App

Empower your frontline workforce with the data and insights they need to do their best work.
ScreenCloud empowers PowerBI customers to get the decision-support data and actionable insights in front of the teams that need it the most, on screen and at scale.

Remotely share business intelligence previously locked behind logins with your deskless and frontline workers, without worrying about security risk.

**How it works**

- **Connect to your account in ScreenCloud**
  Select the PowerBI App inside ScreenCloud.

- **Select and configure your dashboard**
  Filter and customise report display and set duration.

- **Securely display on screens across your organization**
  The screens will update in realtime, with dashboards refreshes at customizable intervals.
Utilizing ScreenCloud’s PowerBI integration allows RPL to:

➔ Provide on-the-floor technicians with data visualizations to track performance in real time.
➔ Provide a 360-degree view of overall plant systems and workflows that allow operators to analyze problems.
➔ Allow teams to save admin time and resource, by moving away from manual, paper-based records.
➔ Streamline their data tools into one system and display their dashboards and productivity metrics to the teams and managers on the manufacturing floor.
➔ See continuous improvements in production and productivity as a result of higher motivation and more time to spend on higher value tasks.

“ScreenCloud has helped save us around 65 weeks a year by moving from manual creation paper based reports over to digital signage, utilizing automated Microsoft PowerBI dashboards.”

Sharon Winning
Continuous Improvement Engineer, Ricoh UK Products Limited
The Microsoft seller
Solve the major issue of “bridging the gap between data and decision making” and “collaborating and communicating on this data” using the PowerBI app in ScreenCloud’s CMS, Studio.

The Microsoft PDMs
Grow their partner ecosystem by expanding the reach of critical business data within organizations that need to make strategic decisions.

The partner
Partners benefit from the opportunity to securely connect people, assets, workflows and processes, and make informed decisions.

Differentiations
➔ ScreenCloud is hardware-agnostic, and works with a wide range of screens, TVs and media players.
➔ ScreenCloud is the leading end-to-end cloud based solution, enabling organizations to manage a network of screens globally.
➔ Easy to install and easy to fix by non-IT people on the ground.
➔ Running on affordable hardware, fully compliant with enterprise networks and security policies.
➔ ScreenCloud integrates with the full Microsoft suite allowing customers to complement their existing workflows and display information from other 365 applications.

Target Customers

Enterprise companies who have a large deskless workforce looking to improve productivity and engagement with frontline workers.

Companies looking to ‘unsilo’ data and processes and migrate to the cloud.
ScreenCloud
Post to Screen

Keep your entire workforce informed and up to date, and improve communication and collaboration.
We know that not all of your employees are sat behind a desk using Microsoft Teams. ScreenCloud’s Microsoft Teams integration will make sure every worker – mobile, deskless or frontline – gets the information and messages they need, in real-time.

How it works

Add the Post to Screens app
Connect your ScreenCloud account and link to a specific Teams channel

Open the app and curate your message
Open the app and add your message and preview

Post the message and your screens update
Get the message in front of your frontline workforce
PAM X ScreenCloud

Utilizing ScreenCloud’s Post To Screen allows PAM to:

➔ Extend the reach of MS Teams communications to all employees by automatically publishing posts to screens.
➔ Prompt action by publishing QR codes on screen for mobile and deskless viewers to scan.
➔ Simplify the process of onboarding new employees, sharing insights, and collecting ideas and feedback.
➔ Deliver a branded destination for frontline workers to have access to company news.
➔ Promote employee wellbeing and reduce turnover.

“It saves so much time. Publishing content directly from Microsoft Teams allows me to communicate messages as they happen, in almost real-time. It will also make sure the content is always fresh”

Chloe Marris
Human Resources Advisor
Target Customers

Enterprise organizations looking to improve deskless worker engagement and productivity.

Bridge the gap between management and frontline workers; with internal comms that are visible and accessible to all.

ScreenCloud Value Proposition

The Microsoft seller
Accelerate partner-to-partner empowered selling by leveraging modern automated technology that allows businesses to engage their workforce with minimal effort.

The Microsoft PDMs
PDMs can attract partners that focus on employee engagement within the deskless workplace. Over 80% of the global workforce are deskless and digitally detached. The MS Teams app in ScreenCloud Studio has the ability to bridge this divide.

The partner
Microsoft partners can yield returns from organizations that are currently investing in strong internal communication, and encouraging and supporting employee communication, whether the focus is information-sharing, or building community and culture.

Differentiations

➔ ScreenCloud is hardware-agnostic, and works with a wide range of screens, TVs and media players (including our proprietary operating system, and device, ScreenCloud OS).

➔ ScreenCloud is the leading end-to-end cloud based solution, enabling organizations to manage a network of screens globally.

➔ Easy to install and easy to fix by non-IT people on the ground.

➔ Running on affordable hardware, fully compliant with enterprise networks and security policies.
INCREASE ENGAGEMENT

ScreenCloud Viva Engage

Make your deskless and frontline employees feel recognized, valued, and seen
Create a Viva Engage app instance

In Studio, connect your Viva Engage account by linking to a specific channel.

Open the app and curate your message

Open the Engage app and post a discussion, survey poll, or peer praise.

Post the message and your screens update

Get the message in front of your frontline workforce.

ScreenCloud's Microsoft Viva Engage integration uses screens to share thoughts, insights, achievements, and recognition. The result is a more connected and motivated workforce, where every voice contributes to a thriving and dynamic work environment.

How it works
Choate X ScreenCloud

Utilizing ScreenCloud’s Viva Engage integration allows Choate to:

➔ Extend the reach of communication to all employees by automatically publishing Viva Engage content to screens.

➔ Surface discussions, feedback, and ideas allowing digitally detached workers to stay informed about ongoing topics.

➔ Promote interactivity – links and documents shared within translate into QR codes on screens, enabling easy actioning for mobile or deskless workers.

➔ Share peer-to-peer praise and recognition posts, which automatically transform into captivating displays, no designers needed.

“One way to encourage our culture was to share with everybody what's going on in the company, showing the good work we're doing, the diversity of our employee-owners and the jobs that we work on. As well as some of the fun, cool things that go on around Choate, showing that culture and family vibe we have here.”

Jon Micheletoo
Internal Communications Specialist
Target Customers

Enterprise organizations looking to build connection, culture and community within their deskless workforce.

Enterprise organizations wishing to bridge the gap between corporate and frontline workers; and between deskless workers and knowledge workers.

ScreenCloud Value Proposition

The Microsoft seller

Accelerate partner-to-partner empowered selling by leveraging modern automated technology that allows businesses to engage their workforce with minimal effort.

The Microsoft PDMs

Empower partners to address the critical need for employee engagement in deskless workplaces. Through ScreenCloud’s Viva Engage integration, partners can ensure the sharing of content which promotes wellbeing, community and connection; which have a direct bottom-line impact.

The partner

Microsoft partners can yield returns from organizations that are currently investing in strong internal communication strategies. Innovative solutions such as Viva Engage can encourage and support employee engagement, whether the focus is promoting internal mobility, benefits packages or cultural events, or simply providing a forum for recognition and praise.

Differentiations

➔ ScreenCloud is hardware-agnostic, and works with a wide range of screens, TVs and media players (including our proprietary operating system and device, ScreenCloud OS).

➔ ScreenCloud is the leading end-to-end cloud based solution, enabling organizations to manage a network of screens globally.

➔ Easy to install and easy to fix by non-IT people on the ground.

➔ Running on affordable hardware, fully compliant with enterprise networks & security policies.
**Case Study: Coca-Cola ‘Company TV’**

Becoming the default OS for screens that communicate

Together, a network of screens showing company content becomes “Coca-ColaTV”.

Connected screens, connected teams.

See how the use cases for screens expand across the company.

“ScreenCloud connects our teams with screens whilst also enhancing the performance of each individual system. As the use cases grow and more applications get deployed, ScreenCloud expands its reach organically across our organization.”

---

**Use case 1**
Company updates via screens. Prove display of health and safety messaging

**Use case 2**
Extend the reach of content fed from Firstup - employee engagement platform

**Use case 3**
Display dashboard and metrics from PowerBI inside manufacturing plants for productivity uplift

**Use case 4**
Integrate with WorkDay to show new joiners, employee anniversaries, praise etc.

**Use case 5**
Push content from MS Teams and Sharepoint onto screens

Each additional team and use case has a multiplying effect on value, creating a robust competitive moat
We need to communicate value, we need to communicate opportunities and we need to connect with each other. And that’s what’s really cool about ScreenCloud.

What ScreenCloud and digital screens allow you to have is this instant connection. With just one click in Microsoft Teams, your message is where you need it to be. ScreenCloud is all about getting the right message to the right person at the right time.

Johnny Voruz
Technical Operation Analyst
Werner Enterprises

The digital signage we used before... it was very difficult for our IT function to manage, and deploy across multiple sites. Bringing ScreenCloud on meant we could expand our use of this solution, and seamlessly display production analytics from Microsoft Power BI.
