Modern Communication

100% automated. 100% simple.

$1.49

Per User, Per Month

20 Minutes Ready!

Start calling in 20 minutes.
No setup time!

PEAKUP Technology

What is the benefits of PEAKUP as a Direct Routing Provider?

DID Management

PEAKUP handles every aspect of number management, making it easier for you to request, assign and monitor numbers.

PEAKUP supports the management of international carriers and multiple carrier side SIP trunks making international DID management simple.

Call Termination

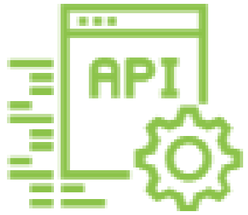
PEAKUP can connect with multiple carriage providers, delivering inbuilt carriage redundancy and scalability for your voice offering.

Security & Compliance

Your data is Encrypted at rest. PEAKUP's stringent security protocols mean your data – and your customers' – is always safe, private, and governed by you.

Billing

Simplify billing with PEAKUP's tri-tiered system for wholesalers, partners and customers.

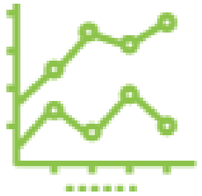


API & Triggers

PEAKUP's extensive API means you can seamlessly integrate it with your BSS/OSS systems. You can even develop custom applications to elevate the platform’s standard capabilities.

Integration With Leading Systems

With PEAKUP's API documented and defined in Swagger, creating fully integrated workflows has never been simpler.

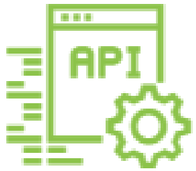


Reporting

PEAKUP pools and generates CDR records from multiple carriers, enabling detailed reports to be automatically generated.

Orchestration

PEAKUP was originally built for Microsoft Teams Calling. Now, it's evolved to become an all-in-one way to orchestrate your telco products and services.



Scalable Architecture

PEAKUP is built on Azure and can also run on other cloud platforms or bare metal server infrastructure. The platform is live in 16 regions making it the first fully global Telco as a Service offering.
