

# ITVT ChatGPT on your data

In today's fast-paced digital era, every enterprise is a vast reservoir of knowledge, often held within diverse databases and extensive document systems. The challenge? Effectively and swiftly navigating these pools of data to extract valuable insights and information.

ITVT ChatGPT on Your Data is an innovative solution crafted by ITVT GmbH, designed to bridge this very gap. By harnessing the unparalleled prowess of OpenAI's ChatGPT, we offer organizations a streamlined and efficient method to retrieve information, communicate in natural language, and automatically generate accurate answers based on their proprietary data.

## Automatic responses 100% based on Enterprise Data

From swiftly analyzing vast document repositories to offering error-tolerant solutions that can understand texts even filled with typos, ITVT ChatGPT on Your Data ensures that businesses don't just access their data but truly leverage it.

Whether you're looking to enhance internal communications, improve customer service responses, or simply unlock the hidden potential within your enterprise data, our assessment is the first step towards a smarter, more efficient future.

## Assessment Components

Embark on your journey with ITVT ChatGPT on Your Data assessment, which encompasses:

- ▶ Use Case Clarification: Collaborate with us to pinpoint the optimal use case for your ChatGPT solution.
- ▶ Architecture Proposal: Receive a bespoke architecture design, aligning with your unique needs.
- ▶ ROI Analysis: Dive into a detailed examination of the required effort, ideal pricing, configuration model, and an estimation of potential revenue.

# ITVT ChatGPT on your data

## Features and Benefits

### Secure:

With OpenAI SaaS services on Azure, your data remains confined to your Azure tenant and is never used for model training.

### Speed:

Dive into extensive documents and extract pivotal information in mere seconds.

### Scalable:

A wholly cloud-based solution, tailored to meet your specific workload demands.

### Error Tolerance

Much like humans, the OpenAI LLMs can discern texts, even those littered with typos.

### Multi-lingual:

Supports nearly every global language, inclusive of dialects and artificial languages

### Effortless Management:

Eliminate the need for constantly updating FAQs or databases; every query procures an answer.

### No Need for Experts:

Sidestep the need for specialized teams to decipher complex documents. Rely on OpenAI and ChatGPT's inherent expertise.

### Elevate Your Information Retrieval

Unveil the limitless potential of your enterprise data with ITVT ChatGPT on your data.

### No Need for Experts:

Sidestep the need for specialized teams to decipher complex documents. Rely on OpenAI and ChatGPT's inherent expertise.

### Intuitive Interface:

Queries can be posted either through a dedicated portal or via an integrated chatbot in your Power Platform infrastructure.

The process entails:

- ▶ User inquiry via the Chat User Interface.
- ▶ Azure Cognitive's "relevance search" retrieves pertinent documents.
- ▶ The integrated Azure OpenAI service, armed with the query and associated passages, crafts detailed responses.
- ▶ Information from a vast array of documents is scrutinized to generate in-depth, informative answers.
