ORDINA
Ahead of change

Application Modernization Assessment

Why customers use Ordina's **Application modernization assessment service**

- Understand how to make an application **future-proof**
- Get insights in how to increase **reliability, scalability** and **security**
- Direct feedback from our **Azure certified** experts

The future of your application lies in Azure! But do you wonder if it is really the case? Find out with the application modernization assessment!
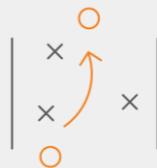

What you can expect

A clear view of the benefits as well as associated risk regarding an application modernization into the cloud. This assessment help you to lever Azure Platform Services to modernize the infrastructure of your application and enjoy the benefits of scalability, reliability, security and what additional benefits a cloud modernization can bring.

What you will get

A summary of the possible drivers and blockers for your modernization

An overview of the different possible strategies with their pros, cons and risks

A high-level roadmap of your modernization journey

This assessment is limited to 1 ASP.NET application
