

Accelerate your cloud transformation

Cloud Professional Services from Bell

Moving workloads, applications and data to the cloud can seem like a daunting task, especially if you plan to use multiple cloud providers or keep certain applications on-premises. You need a partner who can help you identify the best path to maximize your cloud investments, mitigate risk and optimize your operations.

With Cloud Professional Services from Bell, expert cloud advisors will work with you to design and deliver solutions that meet your needs, no matter where you are on your cloud journey. We can assess your current infrastructure and workloads, examine your cloud goals and needs, develop the optimal cloud strategy for your business and design the technical solution architecture to help you get there. We'll also handle your migration to ensure a seamless and agile transition to the cloud – and can even manage your cloud infrastructure and security 24/7 so you can focus on running your business.

Benefits of Cloud Professional Services from Bell

✓ Build out your cloud strategy

Leveraging proven tools and cloud adoption methodologies, we'll conduct a complete assessment of your workloads and applications. Our experts can help you maximize the benefits of cloud technologies, by determining the best destinations and targeting best-fit applications.

✓ Simplify your path to the cloud

We'll help you advance your cloud journey by providing you with a complete migration roadmap and steps to execute the plan. With low-risk and budget-friendly options, you'll know where to focus, where to consolidate effort and how much it will cost as your business grows.

✓ **Migrate to the cloud with confidence**

Migrating to the cloud enhances business agility, operational resilience and innovation, while modernizing infrastructure and optimizing costs. However, migration can be resource-intensive and challenging. Our migration specialists have the expertise and experience to help you successfully migrate your workloads and applications to the cloud – mitigating risk and enabling business transformation at scale.

✓ **Reduce the complexity of managing your cloud**

Cloud management can be complex, especially in a multi-provider, hybrid environment – taking your team away from other business-critical projects. Our team can oversee every aspect of your cloud including 24/7 infrastructure and security management.

Why cloud services are better with Bell

End-to-end experiences

Build your hybrid multi-cloud strategy and advance your cloud migration with the help of our expert cloud advisors and professional services.

Advanced partner ecosystem

Increase business agility, resilience, efficiency and innovation at scale, by leveraging our global partner ecosystem.

Industry-leading solutions

Accelerate your digital transformation, and time to value, with Bell public cloud connectivity, hybrid multi-cloud solutions, managed cloud security, software-as-a-service and more.

Canada's largest network with world-class security

Maximize the value of your cloud transformation with our national and low latency network. Access workloads, data and applications securely – anytime, anywhere.
