

TRANSFORM YOUR BUSINESS

Business Runs Better on Connected Workspace

Connected Workspace Transforms the Way We Work

Since our founding in 2002, Accelera has pursued the idea that every person who interacts with IT should have a flexible, connected workspace; a place where any device can access personal and business data without compromising security. We know that employees who have access to flexible workspaces are happier, more productive, and in turn, provide better service to their customers. We provide every Accelera employee with access to their own virtual workspace, where they can work from any device, any time, and anywhere. Accelera empowers our customers' organizations to provide these flexible workspaces to their employees too, while improving security, reducing cost, and improving user experience across every part of IT.

Reimagine the Workplace

Accelera is helping organizations build workforces that are more productive. We're building digital workspaces that deliver secure access to cloud, mobile, web, and Windows apps on any smartphone, tablet or laptop through a unified catalog and a single sign-on (SSO) experience. A **Connected Workspace** gives employees the flexibility to work from any device and any location with secure, single-click access to desktops, applications, and data. As a result, Connected Workspace reduces demand on IT infrastructure and staff. Your employees can stop fighting fires, and start growing your business.

Secure and Compliant by Design

Desktops and applications delivered from Connected Workspace reduce the risk of data loss because all data remains in your control. Add multi-factor authentication, FIPS and FedRAMP compliance, HIPAA, and more, and you've got a fully secure, flexible workspace solution.

Enable Telework and BYOD

Allow your employees to work from anywhere with any device they choose! With built-in fault tolerance, business continuity, and security at the forefront of the design, Connected Workspace lets you say "yes" to your employees.

A Better Approach to IT

Connected Workspace is a secure, production-ready desktop and application delivery solution, offered on-premise or in a pay-as-you-go cloud service model. It's a simple, flexible, and affordable way to provide modern IT services to your organization.

EMBRACE FLEXIBLE WORKSPACES

Provide secure access to desktops, applications, and data from any device, at any location, over any network with Connected Workspace.

On-Premise or in the Cloud, Connected Workspace can be under your control, or delivered to your organization as a cloud service in Azure. As a cloud service, Windows desktops and applications are delivered to your users on demand, to any device at any location, while the infrastructure is hosted and fully managed by Accelera. Connected Workspace in the cloud is simple to enroll and there's no software or hardware to maintain. And with a pay-as-you-go model, your organization can scale up during busy times and reduce costs when less services are needed. We manage everything so that you don't have to.

We've done this for years. In fact, Accelera Solutions has been building secure, digital workspaces for commercial and Federal organizations for longer than many solution providers have been in business. We have implemented and continue to operate workspace delivery solutions that range in size from a few dozen users to some in excess of 50,000 seats.

Our Connected Workspace Partners include

Why Accelera?

Accelera Solutions is a leading provider of cloud, mobility, and virtualization solutions. We've worked with hundreds of commercial, Federal, state, and municipal government clients to implement solutions that drive cost savings and make IT more efficient. Our services include professional consulting, staff augmentation, and full IT managed services.

Accelera is a Small Business with extensive experience and documented past performance in the public and private sectors.

Accelera is the
**Microsoft Federal Cloud Partner of the
Year for 2015 & 2016**
