DIGITAL TRANSFORMATION

We help organizations **accelerate** the path to **digital transformation** through data analytics and application development.

AREAS OF FOCUS

DATA & ANALYTICS

Create a competitive advantage by extracting the value of your organization's least utilized asset – data – by unlocking new insights.

ARTIFICIAL INTELLIGENCE

Leverage AI & Machine Learning to take your data to the next level by incorporating practical data science solutions into your business.

INTERNET OF THINGS

Extract insights from all your company's "things". Whether it's in the cloud or at the edge, digital feedback loops can transform your business.

INTELLIGENT APPLICATIONS

Build highly secure and scalable AI Oriented Applications for Mobile and the Web to drive internal and external innovation.

STRATEGY

Establish a strategic roadmap for analytics, app dev or IoT.

PROJECTS

Deliver high value projects consistently with our proven methodology.

TRAINING

1 to 5-day curriculums to improve return on your Microsoft investments.

QUICKSTARTS/POCs

Accelerate adoption and utilize the Cloud to minimize initial investment.

PRODUCT DEV

Speed your time to market with our cloud architecture & PaaS expertise.

MANAGED SERVICES

Proactive support model delivers expertise without additional FTE cost.
