

AILA Text Intelligence

AI & Data Science

We support you in building AI and Data Science solutions. Our services cover the entire lifecycle - AI consulting, setup of your MLOps platform, and use case implementation. We automate decisions in your specific application contexts through a successful combination of algorithms, methods and data.

ADDED VALUE

- Visualization and processing of the processed text data
- Connection to existing platform/products and direct transfer to automated processes
- Independent marking and classification of texts and documents
- Analysis of contracts and extraction of relevant information for the initial assessment
- Support ticket classification

MODULES

- Our AI platform combines various modules with already pre-trained models for the following areas of application
- (IoT) Sensor Intelligence,
 - Computer Vision, and
 - Text Intelligence
