Exploring Power Platform Assessing Business Needs

Evaluate whether the Power Platform is a suitable solution for addressing your specific business needs

Consulting Service from IT Assist

Comprehensive assessment of the organization's processes, challenges, and goals to gather vital information for further analysis.

Primary challenge

Effectively extracting pertinent information about the organization's processes, challenges pain points and goals. Ensuring that all relevant details are collected and understanding the nuances of the business.

Ideal solution

Utilize probing questions and attentive listening to gain a thorough understanding of the organization's processes, challenges, pain points and goals.

Desired outcomes

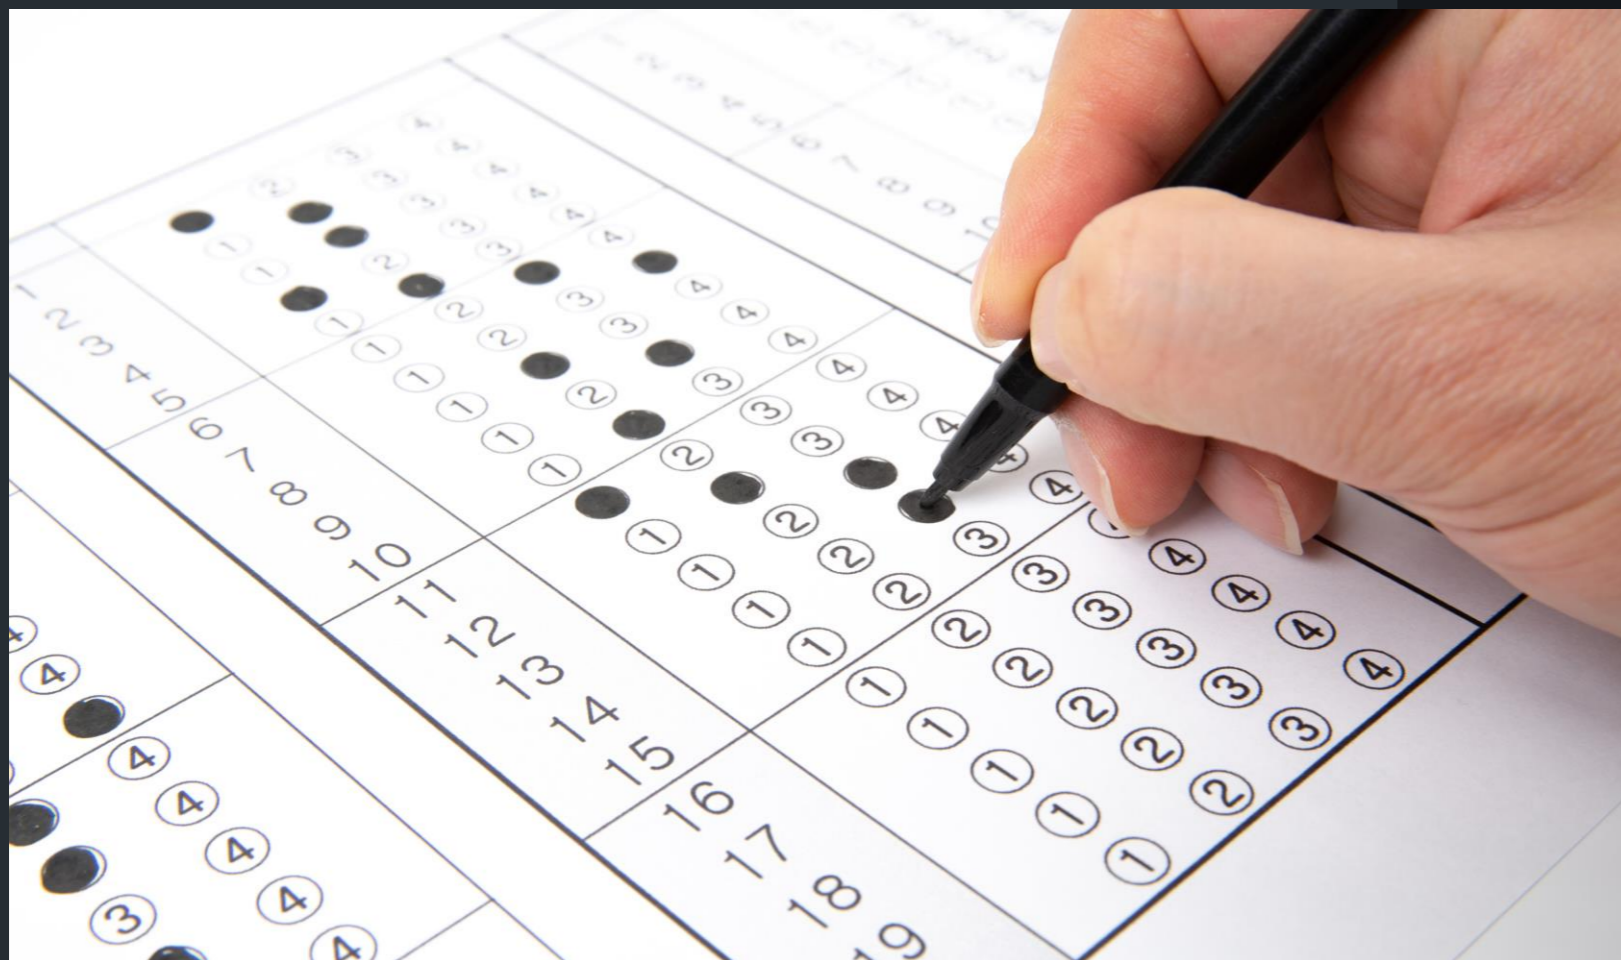

Achieving a comprehensive understanding of the customer's business needs. By gathering all relevant information about their processes, challenges, and goals, the consultant aims to develop a clear and accurate picture of the organization's requirements.

#1 Assessment Challenge: Capturing Comprehensive Business Insights

#2 Assessment Challenge: Identify suitable Power Platform Solution

Identifying the most suitable Power Platform solutions for addressing the organization's specific challenges and goals

Workflow Analysis

Conducting a detailed analysis of the organization's workflows and processes to identify areas that can benefit from automation, optimization, or customization using the Power Platform. This includes understanding current workflows, pain points, and opportunities for improvement.

Data Management Evaluation

Evaluating the organization's data management requirements and determining how the Power Platform can support efficient data collection, storage, integration, and reporting. This involves assessing data sources, data quality, data governance, and the need for real-time insights or analytics capabilities.

Identify Gaps and Mitigations

Identifying any gaps or limitations in the existing processes or systems that may hinder the successful implementation of the Power Platform. This includes assessing integration requirements, compatibility with existing systems, potential data security or compliance concerns, and proposing mitigations or solutions to address these gaps effectively.

IT Assist and Microsoft Power Platform

Our expertise can help SMBs and enterprises to create customized, cost-effective solutions, automate processes, and make data-driven decisions, enhancing operational efficiency and agility.

Our consultancy services covers:

➤ Assessing Business Needs

Understand the unique requirements of each business and identify areas where the Power Platform can bring value

➤ Solution Design & Developm.

Leverage the low-code capabilities of Power Apps to rapidly develop applications that solve specific business problems

➤ Data Analysis & Reporting

Leverage Power BI to assist SMBs in gaining valuable insights from their data, enabling data-driven decision-making and helping businesses identify opportunities for growth and optimization.

Customer success: from spreadsheets to enhanced collaboration

"The Power Platform has greatly assisted our team by revolutionizing our project management processes.

With customized applications built using Power Apps and seamless automation through Power Automate, we now have real-time visibility, enhanced collaboration, and streamlined workflows, resulting in improved efficiency and client satisfaction"

Real-time visibility

into their project progress, tasks, and milestones. Stakeholders stay informed about the status of various projects and make informed decisions based on up-to-date information.

Enhanced collaboration

by enabling seamless communication through the custom applications, team members were able to collaborate more effectively, share information, and work together towards project success.

Streamlined workflows

Manual and repetitive tasks were automated, reducing administrative overhead and enabling employees to focus on higher-value activities.
