

SQL HEALTH CHECK

About ConvergeOne:

We invest in our customers through a series of strategic workshops to learn and uncover true business challenges within an organization. This methodology allows ConvergeOne to then tailor and roadmap a series of Microsoft solutions to meet your challenges today and deliver on real business objectives.

Microsoft SQL SERVER HEALTH

SQL Preferred Practices
Indexing / Vacuuming
Fragmentation
Backups
Memory Configurations
I/O, CPU, Memory Bottlenecks
Automation of scheduled tasks

WHAT WE OFFER

Our certified SQL experts will review the performance, maintenance, and infrastructure of your Microsoft SQL Server environment in Azure or On-Premises to ensure maximum health and productivity of your platform

We'll then build a tailor-made plan focusing on addressing your overall health of your SQL server, ensuring any security, performance, and overall preferred practices are in place.
