

Move models, Not data

integrate.ai is the **safe data collaboration platform** for AI and analytics that enables data science leaders to activate data silos by moving models, not data.

Lack of access to quality data at scale blocks mission critical AI & analytics use cases

Data science leaders need to **safely activate data silos** and access relevant data within and across organizations, jurisdictions, and environments

Activate your data silos for safe analytics and AI

Improve outcomes

- Multi-silo data evaluation
- Federated learning and analytics

Activate with ease & flexibility

- Plug-and-play SDK + manage infrastructure
- Multi-cloud, hybrid, on-premise
- Robust data and model type support

Protect privacy & trust

- Privacy Enhancing Technology
- Governance controls

Activate data silos at any scale and complexity

Single party projects

Break down internal data silos across departments, subsidiaries, geographies, and environments

- Multinational data science
- Open data research
- Cross-banner analysis
- Multi-cloud analytics & AI

1:1 partnerships

Safely collaborate with external data partners to utilize data you otherwise could not access

- Supply chain logistics
- Partnership/M&A evaluation
- Co-marketing/selling
- Hospital operations

Clean intelligence networks

Create dynamic intelligence networks with multiple partners, at any scale, with any data, anywhere

- Modern clinical trials
- Risk modelling
- AI drug discovery
- Fraud detection / AML

integrate.ai is trusted to power the most sensitive and complex AI collaborations

Problem

Regulations restrict researchers' access to quality patient data for machine learning, and limit advances in precision healthcare.

Solution

integrate.ai accelerates access to secure, interoperable patient data and advances genetic insights across complex disease areas.

Network Partners	Research Studies Enabled	Genomics Data
20+	100+	4,000 TB

Unlocked use cases

- Modern Clinical Trials
- Retail Health Operations
- Healthcare Operations
- A.I. Drug Discovery
- More

Safe data collaboration you can trust

- Privacy by Design
- Security by Design
- Compliance by Design

1st AI company globally to be Privacy by Design Certified

Activate data silos in 3 simple steps

01

```
pip install integrate-ai
```

Connect your data

Create an account, install the integrate.ai SDK, and connect Smart Task Runners on Azure

02

Invite your customers/partners

Connect new data sources from trusted partners within Azure, across clouds, and on prem

03

Activate your data silos

Enhance your existing models and train new models with intelligence from across your network
