Microsoft Teams Deployment: 2-Days Workshop

Primary Products: Microsoft 365, MS Teams; **Pricing:** 1000$

What is it?

Sometimes companies are undecided on how they should plan their Teams rollout. Microsoft Teams has the enterprise class policies and security that you need and expect as well as easy customization options to tailor your team's experience to your users and your organization. Our workshop helps companies decide on the best steps in order to increase efficiency and get the most out of Microsoft Teams.

Who is this for?

Cloudica designed this workshop for IT departments of small companies that would like to implement, migrate and maintain Microsoft Teams for their staff.

Microsoft Teams Deployment: 2-Days Workshop

What are the benefits?

Based on Cloudica's years of experience in helping companies fully utilize the enormous possibilities of Microsoft solutions, this Workshop will ensure that your IT staff are able to have full control over the company's Teams deployment and understand all the possibilities offered by this dynamic tool.

Outcomes of this:

- Which subscriptions are best for your business.

- How to prepare your organization's network for Teams.

- How to configure integration with Microsoft 365 services (SharePoint Online, Exchange Online, OneDrive) and other apps.

- The steps of the implementation process and its impact on users.

- How to monitor usage and feedback.

- How to start your organization-wide rollout.

- Maintain Teams running smoothly as the company grows.

- Deal with possible problems.

Steps and agenda:

- Discussion of the company's needs and plans

- Presentation of all the key features in Teams

- Overview of how to best implement the rollout

- Discussion of the solutions to possible problems

- Presentation on how to self-manage the regular upkeep of Microsoft Teams
