## DESCRIPTION

Microsoft's ever evolving Azure cloud platform provides more than 200 products and services to solve today's challenges and create the future. With Azure you can build, run and manage applications across multiple clouds, on-premises and at the edge, with the tools and frameworks of your choice.

Get ready to adopt Azure and put your foundations in place in just 2 weeks!

Microsoft's ever evolving Azure cloud platform provides more than 200 products and services to solve today's challenges and create the future. With Azure you can build, run and manage applications across multiple clouds, on-premises and at the edge, with the tools and frameworks of your choice.

cubesys is one of Australia's leading, Azure certified, partners offering onboarding services to get you started on the right foot. Our deep understanding of Microsoft Azure and its Cloud Adoption and Well Architected frameworks will remove risk. We'll help you ensure the foundations are in place to get started with confidence, ensure your environment is secure, easy to run and operate - we have the real-world experience to help!

But where to start? Operating and commercial models in the cloud are different. In order to lay the right foundations to build your cloud environment it's paramount to understand how Azure is billed, governed and operated. Our experienced experts have all the right knowledge to get you started:

- ✓ Understand the Cloud Adoption and Well Architected frameworks
- ✓ Get started on naming and tagging standards
- ✓ Address security and compliance needs
- ✓ Set guardrails with policies & establish connectivity
- ✓ Plan your management and subscription structure
- ✓ Prepare your first landing zones
- ✓ Choose the right tooling (such as Azure DevOps, GitHub) to adopt a modern operating model
- ✓ Plan for budgeting, cost control and optimisation
- ✓ And finally provide guidance on operational best practice and next steps.
