

OpenAI & Data Hackday

Hackday is a one day internal "conference" for your experts, organized by Zure.

The OpenAI & Data Hackday provides your organization concrete experience on OpenAI and Azure data capabilities.

During the Hackday, Zure professionals present tasks and guide your experts through concrete activities related to OpenAI and data capabilities in Azure, with your organization's data.

After the Hackday, your organization can plan and execute projects related to OpenAI and data in Azure.

HACKDAY

- Hackday is a full-day internal conference for customer's experts
- The proposed themes are OpenAI, data engineering and data visualization with Power BI
- The themes are planned and decided before Hackday on a common kickoff meeting
- The attendees are mostly data experts, such as AI & ML professionals, data engineers and reporting experts
- Zure will bring 6-7 professionals to the event, to host the Hackday, present the tasks, and train & guide the attendees in executing the tasks
- Hackday is normally held at the customer's premises, although Zure's office is an option

EXAMPLE HACKDAY

- 0900-0930: Welcome words & introduction
- 0930-1000: OpenAI (OpenAI task)
- 1000-1030: Data engineering (Azure Synapse & data transfer task)
- 1030-1100: Data visualization (Power BI task)
- 1130-1230: Lunch
- 1230-1300: Training OpenAI (OpenAI task)
- 1300-1330: Virtualization & Spark (Serverless SQL & notebooks task)
- 1330-1400: Advanced reporting (Power BI task)
- 1400-1430: Coffee
- 1430-1530: Finalizing & demoing tasks
- 1530-1600: Closing words & next steps

NEXT STEPS

- Plan and execute OpenAI & data projects with own experts and/or with the aid of Zure
