# Mainframe Modernization
## REHOSTING

While the mainframe is a platform of choice for enterprises that rely on computing power and stability, its legacy technology and software requirements are complex and expensive to maintain. FNTS has decades of mainframe expertise and is ready to assist with your mainframe modernization or exit strategies. We not only help organizations improve performance and reduce total cost of ownership (TCO), but we also perform data manipulation and extract data to the cloud utilizing enhanced tools and integration methods.

**When combining Mainframe-as-a-Service (MFaaS) with a rehosting strategy you will benefit from:**

- Optimizing mainframe overall costs. With rehosting, we provide a bridge between your current state and the cloud. Reducing your expenses to help fund your modernization efforts.

- Management of your entire mainframe environment remotely or on-site at FNTS' secure data center.

- Allow your current mainframe staff to focus on future state vs day-to-day operations.

- Remediate resource and staffing risk.

- Save 15-20% (on average) moving to a MFaaS model.

- We will help design the architecture and deployment in Azure.

FNTS specializes in helping you create and execute a MFaaS model as part of the rehosting phase. This provides a bridge until FNTS and our expansive partner network can refactor or replatform the applications in Azure.

| Modernization Strategy | Outcome |
|---|---|
| **Mainframe-as-a-Service** | Management of your entire mainframe environment remotely at FNTS' secure data center. |
| **Rehost** | **Rehosting** often referred to as a "lift-and-shift migration", this option doesn't require code changes. Shifts the workload to the cloud at the lowest cost. You can use it to quickly migrate your existing applications to the cloud. |

Once you've determined your mainframe modernization strategy for your organization's digital transformation, FNTS will partner with you to accomplish the following:

1. Detailed analysis of your existing environment

2. Define a transformation plan

3. Develop a business case

4. Facilitate your mainframe transformation with the least amount of disruption and risk

"**Modernization is no longer an IT desire, but an operational necessity.**"

*— Gartner, Impacts of COVID-19 on Government Technology Optimization and Modernization, 5.20.2020*

**Begin your mainframe modernization today with FNTS!**

Contact one of our consultants to discuss your digital transformation strategies and how FNTS can become a trusted extension of your team helping along the way.
