

# Rise with MIND for Tomorrow's SAP Intelligent Enterprise

**MIND's SAP on Azure**

# Accelerate your SAP Transformation with Microsoft Azure

SAP migration to the cloud has become a top-of-mind concern for enterprises for many reasons which includes lower TCO, Operational resilience, enhanced productivity and business agility. Moving SAP workloads to the cloud is a complicated and crucial process implying the transition of data, applications and technologies from the company's local infrastructure to a remotely managed platform. Bringing them to the cloud isn't a simple "lift and shift" operation and requires expertise and deep understanding approach for digital transformation.

## Our Accelerators for SAP Practice

### Smart Support Model

Smart and Innovative  
Support Model for 24\*7 Support

### BOTS

For Automating Service  
Requests and Active Monitoring

### MDM Tool

Manage Master Data  
Hygiene & Consistency

### ITGC Compliance

MIND tool which ensures ITGC  
compliance from Day 1  
including Segregation of Duties

# Migrating SAP workloads to Microsoft Azure Cloud

SAP migration is a complicated procedure of data transition revolving around changes to the hardware, software and the physical location of the SAP landscape. It requires special knowledge, skillset and the engagement of professionals. Therefore, it's important for enterprises to decide for migrating their SAP workloads to cloud at the right time.

## Benefits of moving SAP workloads to Azure Cloud

**Cost Efficiency**  
(lowered TCO)

**Digital Transformation**  
(SAP S/4HANA)

**Agility/**  
**Staff productivity**

**Improved security**  
**and resilience**

**Improved performance**  
**with Scalability**

**Accessibility from**  
**anywhere**

**Industry Solutions**

**Data & Analytics**

**Technical**  
**debt retirement**

# Why we say Microsoft Azure is best fit for SAP workload

With the longest track record of SAP customer successes on the cloud, Azure is the proven cloud provider to run critical SAP workloads. Azure has the most extensive set of services to drive innovation on the cloud, enabling you to unlock new capabilities like AI/ML and IOT to drive new value from SAP applications.

## Leverage Azure Cloud to accelerate your SAP S/4HANA transformation journey

### Longest track record of success

Confidently run mission-critical SAP workloads on Azure, knowing Azure has been running SAP production workloads since 2008

### Most extensive services to innovate

Accelerate innovation by extending SAP systems to a broad selection of Azure services around machine learning and IoT

### Support for the most demanding workloads

Reliably run SAP workloads on purpose-built hardware and scale-out architectures

# Our transformation methodology and phase wise approach

## Assessment

- Clarify high level scope of the project
- Define and clarify business goals
- Understand current SAP landscape inventory
- Identifying Non-functional requirements

## Planning

- Technical Architecture Validation
- Checking prerequisites
- Mapping infrastructure
- Preparing migration plan
- Aligning and on-boarding the team members

## Migration

- Re-evaluate architecture such as HA/DR consideration, latencies
- OS / DB Harmonization
- Right Sizing on Compute & Storage
- Rationalize Non-Production systems
- Optimize Backup Policy/ Retention
- Selecting the right commercial options for optimum TCO

## Optimization

- Clarify high level scope of the project
- Define and clarify business goals
- Define needed working ERP data
- Clean up and categorize Data
- Perform in-depth analysis and extract conclusions

# Why MIND for managing your SAP workloads

## **Regulated Industry Expertise**

(Pharma, Automotive, Manufacturing Engineering etc,)

## **Optimum value**

Experience Of Multiple Transformation Projects

## **Compliant**

Our proprietary ITGC tool inbuild into our support offering

## **SAP Expertise beyond version boundaries**

Entire SAP Life Cycle, Migrations & Rollouts (Ver. 4.6C Onwards – S4HANA)

## **Simplification**

Speedy & Powerful Innovation through Simplification

## **Delivery Excellence**

SLA, Accountability & Continuous focus on Governance

# Benefits of MIND for migration to Azure Cloud

Migrate your SAP workloads to Azure with MIND to modernize your environment and run applications more efficiently. At MIND, we work collaboratively with our clients to guide and assist them in migrating their system to a stable and innovative cloud platform.

## Strategic Transformation

MIND's expertise and flexible deployment options enables seamless migration and deployment of SAP environment to the cloud at clients' own pace.

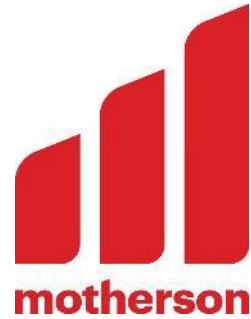

## Be future ready

MIND's core strength around the modern capabilities, such as machine learning and IoT, helps you in driving your business forward and lay the foundation for future successes on the cloud..

## Reduce TCO

Significant cost savings by true consumption-based billing, consistent optimization and support for right sizing all the cores.
