MANAGED SECURITY SERVICES
by White Hat IT Security

True expert approach to managed security with transparent pricing, on every platform **— mobile included.**

Think like an adversary — act like a white hat.

Becoming the target of a cyber-attack is a question of "when" not "if". We use our **hands-on offensive and defensive know-how** and the **unique experience** of our national security past to anticipate and prevent all adversaries – from garden-variety ransomware to highly sophisticated attacks. White Hat IT Security combines **mobile-focused, adaptive 360-degree managed security** with its decade of on-demand cyber experience to hunt for, detect, investigate and remediate all cyber threats 24x7.

In a constantly evolving threat landscape and post-pandemic challenges flexible and adaptive security solutions are essential. Our 24/7 security-as-a-service offers coverage for all platforms, completed by services like ISMS development, TISAX preparation, awareness trainings, monthly assessments or incident response.

24/7 Security Operations Center

With our security operations center an expert team dedicated to your needs can detect and handle all threats and attacks, to provide the highest level of response and avoid alert fatigue.

24/7 security
continuous monitoring and protection without initial investment and additional risk

Shorter response times
our SOC experts make sure alerts are handled and threats mitigated, to reduce potential pivot points, the time window of attacks and the number or false positives

Customer and market trust
constant protection and monitoring makes sure your business is in compliance with all regulatory requirements and offers reliability to your customers

Managed Detection & Response

Managed Detection and Response (MDR) provides intrusion detection, threat monitoring and the management of all alerts in your network with professional know-how and experience.

Cyber experts of proven skillset
elite team of senior analysts dedicated to your organisation, with the specialist skillset of our national security past and decade of experience

Tailored to network specifications
threat hunting and threat intel tailored to your organisation's best fit, constantly evolving to better suit your needs

Prompt and proper threat management
triage and proportionate response to all incoming alerts, reducing false positives and alert fatigue

Security-as-a-Service

All your cyber security needs in one hand, offering full-scope managed solutions completed by on-demand services for a complex transformation of your enterprise security.

Vulnerability testing and inventory
Assessment and inventory of your organisational vulnerabilities with monthly progress reports and roadmap for remediations

Policy deployment and compliance
Transforming your regulatory structure to tackle current challenges of management and compliance

Trainings and campaigns
security awareness trainings and phishing campaigns to ensure elevation of security mindset on an organisational level

IT SECURITY

While reducing your infrastructure attack surface is essential, keeping the human error at a potential minimum is also key. Why spend on penetration testing if a phishing email can easily lead to a successful ransomware attack? White Hat MSS offers a comprehensive toolset integrated into its key services to raise awareness and to keep your colleagues secure in the cyber space.

Phishing protection

In the age of information overload social engineering is among the most successful adversary tools. The most common technique is sending out malicious links or attachments via email to gain access – this is phishing. Raising awareness and training key personnel for common threats helps minimize this attack surface.
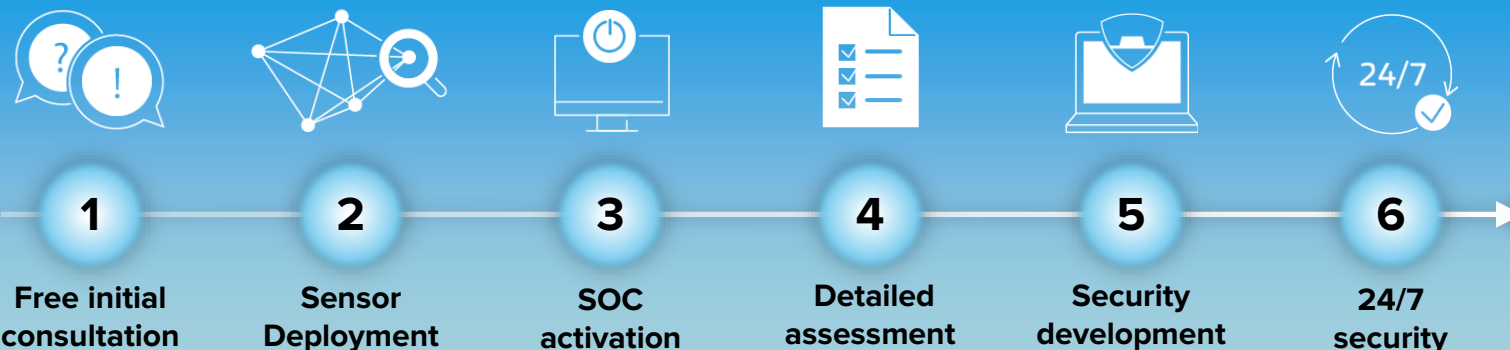

Exploit protection

Today's enterprise endpoints face more sophisticated attacks than ever, especially when they are outside the corporate network and no longer protected by multiple layers of security. Protect against exploitation of known and unknown vulnerabilities across all your IT devices and stay ahead of the latest threats.

Ransomware protection

Ransomware encrypts all your files and data asset it reaches, with no chance of recovery – unless you pay the criminals. This is one of the most widespread attacks nowadays, with thousands of companies effected each year. Using our unique skillset we can prevent, detect and avert all incidents, including ransomware attacks, thus keeping your data safe and your business continuous.

Get started in 6 easy steps

With **onboarding in under 2 weeks**, White Hat MSS provides **all-around protection** for all endpoints, from server through workstation to mobile devices; be it **MAC, Widows, Linux, iOS or Android.**

1 Free initial consultation

2 Sensor Deployment

3 SOC activation

4 Detailed assessment

**5** Security development

6 24/7 security

Resolve ransomware vulnerability and incidents quickly and efficiently, while providing a long-term solution with White Hat rapid response and full-scale management services.

Manage ransomware cases and incidents
we respond rapidly and help reinstate business continuity securely to prevent errors made in haste

Root cause analysis & digital forensics
while under attack there is no time for analyses, but it is crucial to find out how and what happened to prevent it from happening again

Ensure long-term protection
a thorough analysis and managed solutions can reduce the risk of reoccurrence significantly to keep your infrastructure clean

Remember, once a breach is detected **you have 72 hours to report to authorities!** Do you need help? Contact us for reporting assistance!

IT SECURITY

Why White Hat?

Competencies

- Competences certified by the world's top relevant trainings and certifications

- Own product tailored to current cyber landscape

- Unique and rare defensive and adversary removal knowledge thanks to our national security past and our expert team of seniors

- Industry leading professional partners: Microsoft and Zimperium

- Vulnerability research and penetration testing skills deeper than that of others due to our real-life, hands-on experiences

Capabilities

- Excellent response time and rapid deployment capabilities thanks to our local private aviation partner and helicopter

- Academic cooperation and a network of the community's most prominent specialists

- Superior contacts at the world's top security companies to help us in our projects

Compliance and confidence

- EU-NATO Secret level confidentiality

- 1M EUR professional liability insurance

- Customers of complex networks helped on a daily basis
