Crayon

Navigating a cloud migration is complex. As a Microsoft Azure Expert MSP, we'll make sure you avoid the common roadblocks that cause cloud adoption initiatives to stall or fail   before they even start. We'll assess the migration of your applications, data, and architecture to Azure while helping your organization create a cloud strategy to address key security and compliance, disaster recovery and backup, and data retention goals.

This comprehensive migration services assessment will use your real-time data to determine the best plan of action for your business. This process will clearly demonstrate and financially quantify the business value of moving to the cloud.

Assessment Process

The migration assessment has four phases:

Phase 1 … 1-2 weeks

1. Planning

2. Data Collection

Phase 2 … 1-2 weeks

3. Data Analysis

Phase 3 … 1-2 weeks

4. Final Recommendations

Included in the assessment

Here is what you can expect and what is included with every assessment:

- Executive summary
- Business objective review
- Project scope
- Cloud readiness report
- Identification and prioritization of candidates to move to Azure
- High level cost estimates (PAYG, AHB RI over time)
- Proposal for Azure Migration Engagement or Scope of Work to migrate
- CAF Governance Analysis and recommendations

Your Journey

Workshop ▶ **Assessment** ▶ PoC ▶ Implementation

Our Process

Timeline

Reports
- ● Customized
- ■ Out of box

Platform | Standard | Licensing | Workload

1-3 weeks

Phase 1. Planning

Phase 2. Data Collection

Setup
assessment environment and configure all servers in scope

Data Collection
automated data collection with cost and performance analysis

Application Discovery
Application discovery and dependency mapping

1-2 weeks

Phase 3. Data Analysis

Assessment Report
Provides a report for optimized server cloud migration with cost estimation

License Evaluation
Evaluate licensing options with regards to existing license portfolio and proposed cloud environment

Workload Analysis
Perform per- workload analysis based on business objectives and migration strategies, including Retire / Retain, Rehost, Replatform, Refactor, or Repurchase.
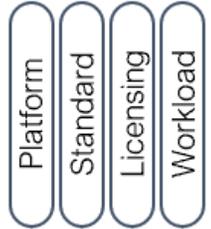

1-2 weeks

Phase 4. Final Recommendations

Migration Plan
Complete migration plan and roadmap based on assessment report and workload evaluation

We help clients optimize and innovate with software, cloud, data and AI. Our team has deep expertise, with over 100 data scientists, each averaging 10 years of experience. Our services can help with a cloud migration, innovate through Azure, and improve the user experience with Modern Work and Teams solutions, all while keeping your data secure.
