

We established our Data & AI practice in 2014. As an Azure Expert MSP, we use a full stack approach, with expertise in every facet of cloud transformation. Work with our team of solutions specialists, architects and data scientists to understand and unlock the real business value of data.

Microsoft Solution Assessments are a set of industry standard best practices that incorporate proven strategies for managing and optimizing an organization's IT assets.

With customers continually looking to streamline operations, increase productivity, and control costs, there are more ways than ever to identify new workloads and services that will support their strategic objectives and grow your business.

How to get started

- Data Platform in 30 Days (DPI30) is led by Crayon and the Microsoft Solution Assessment Team.
- We focus on your current systems, analyze data, and provide recommendations with specific cost estimates.
- Our experts will guide you through a detailed, four-phased approach: (1) Planning, (2) Workshop, (3) Landing zones, and (4) Data platform.
- Minimize implementation risk and costs by designing a tailored and purpose-driven data platform.

Engagement Delivery Approach

Data-driven analysis and recommendations in phases:

3-6 weeks

Planning

Gather information on your infrastructure background

Identify engagement plans and goals

Outcomes

Workshop

Identify scenarios to model in Azure

Provide customer skilling and hands-on learning

Landing Zone Deployment

Includes working sessions to implement ADS to support scenarios

Data Platform Handover

Take over management of modernized data estate

Unlock New Revenue Opportunities with Data & Predictive AI

Unlock the value of existing internal data and enable it to be combined with external sources to produce insight-based recommendations for the business

Next Steps

Align an Executive Sponsor and Dedicate a Project Lead

- Executive Sponsor and a Project Lead will participate in the discovery call
- Customer Project Lead is responsible for aligning customer team and resources to the project plan

Discovery Call

- Introduction to the Microsoft Solution Assessment Specialist and Crayon
- Crayon will perform scoping of the project and key outcomes

We help clients optimize and innovate with software, cloud, data and AI. Our team has deep expertise, with over 100 data scientists, each averaging 10 years of experience. Our services can help with a cloud migration, innovate through Azure, and improve the user experience with Modern Work and Teams solutions, all while keeping your data secure.
