DESCRIPTION

Realise the benefits of cloud-based VDI in just 2 weeks! AVD & W365, both offer organisations across the globe the opportunity to provide secure scalable remote worker solutions, that can cater for legacy applications and corporate desktop environments. Providing users with the familiar workspace and all the data and apps they use in the office. At the same time, IT admins can reduce their workload and provide timely scale out capabilities.

We have already delivered 40+ Virtual Desktop deployments to a wide variety of clients. So our experienced experts have all the right knowledge to help you:

- ✓ Understand the concepts of cloud-based VDI
- ✓ Help you choose AVD or Windows 365 or both
- ✓ Ensure your Azure Landing Zone is ready for AVD or W365
- ✓ Address security and compliance needs
- ✓ Deploy the foundations of AVD and W365

Prepare and publish your first:

- ✓ Multi-session cloud desktop
- ✓ Personal cloud desktop
- ✓ Published application from AVD
- ✓ Finally provide guidance on operational best practice and next steps.

For further discounts and benefits ask the cubesys team about our CSP provisioned AVD offers!
