

About Us

Pepas Cloud has been Microsoft Silver Partner since 2018 and Microsoft Certified Training Center since 2017. In our portfolio there are over 150 companies from 5 up to 7000+ employees in Romania and abroad. In our portfolio we have over 20 companies with main activity accounting and financial services.

We are team of 11 experts and counting, with 4 years on the market as Pepas Cloud. Our team has large experience with complex Cloud infrastructure, Low code apps and Business Intelligence projects.

Look around you, now technology supports the business and will soon become the business.

To be part of the digital transformation, you have to turn your ideas into values and reduce your time to market. Know all the changes on the market and react fast enough to optimize investments. And most importantly, continue to be aware of the opportunity technology offers to you as well as to the competition. React first!

You need a partner who understands this and helps you grow your business, working efficiently, while innovating for the future.

We help our customers to do business unhindered while upgrading the infrastructure. We help them create efficiency while innovating.

Our team can guide you towards digital transformation, we will show you how to redistribute your budget so you can invest in innovation to streamline your business.

Do you think technology is costly? Try to lead the business without it and you will see how much it costs you!

We are the partner to help you manage and transform your business.

We are both locally and globally available, fast developing and devoted to intelligent solutions.

That's why we are the partner who can help you define, design, implement, manage, transform and lead the business by working smart, not hard!

Services

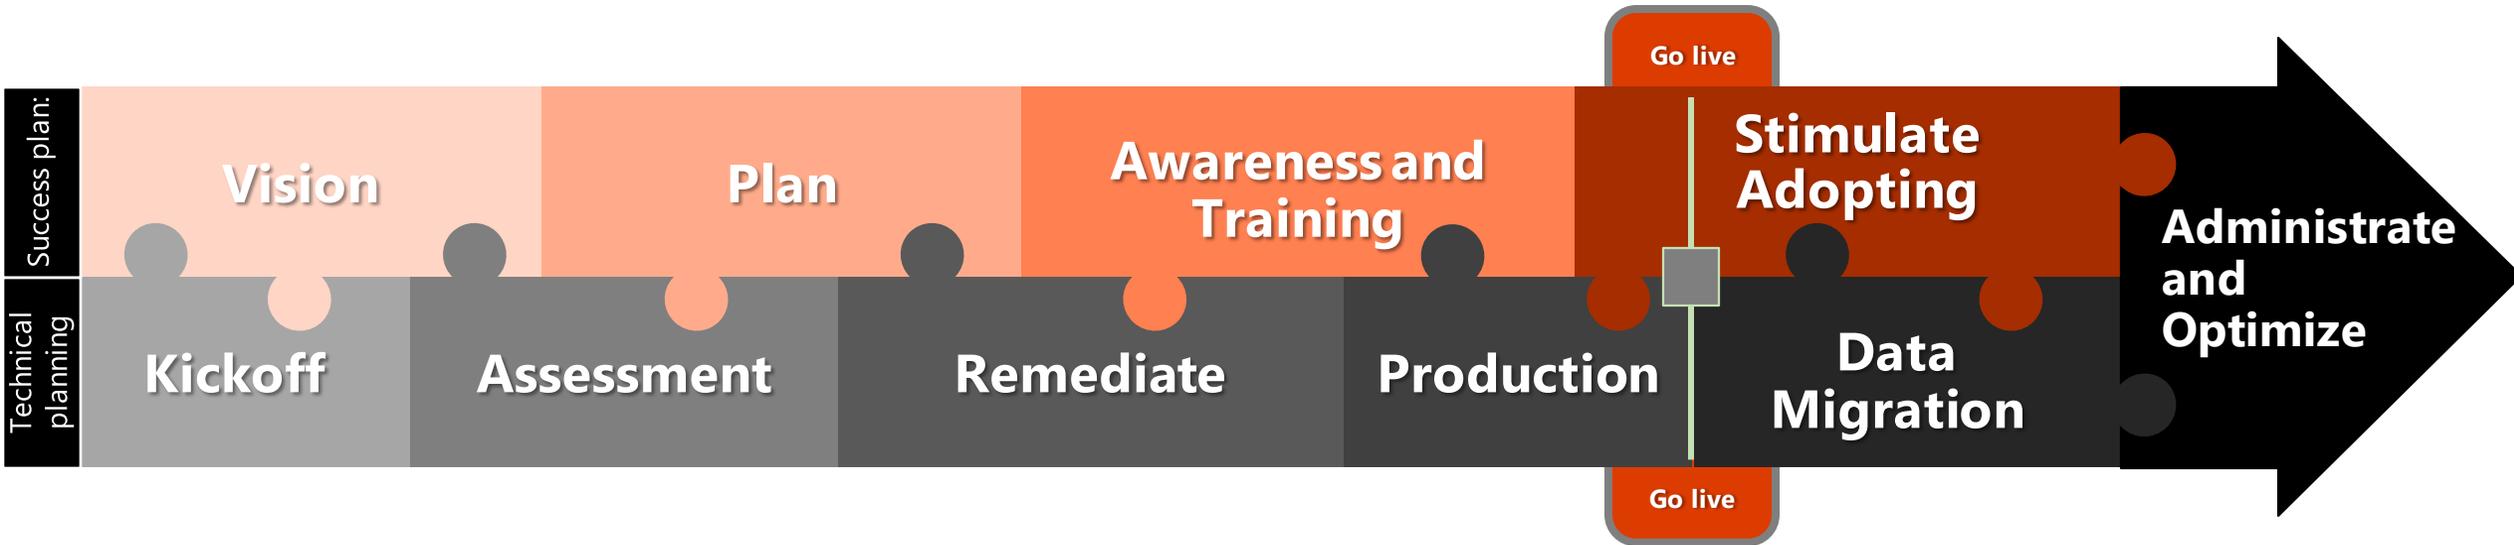

What we did for our customers

Our completed projects:

- Over 2000 users migrated to cloud
- Over 150 Cloud deployment projects
- 23 Microsoft Power Platform Apps
- 150+ active customers and counting
- 22 automatic document generation apps
- 10 dynamic invoicing apps
- 5 large scale websites hosted on Azure
- 100+ devices rented for our customers
- 10+ tenant to tenant migration projects
- 50+ SharePoint Architecture designs
- 1 SAP on Azure migration
- 10 Accounting Software apps hosted on Azure
- Actively working with 20+ accounting and financial services companies to develop business process automation flows
- 10+ multinational companies with over 500 employees in our portfolio

We work as a team to ensure success

- Set workflows
- Determine the tasks for the involved parties
- Define business objectives and use cases
- Identification of specific actions that will guarantee successful a deployment

- Adapted technical support to deal with any situation in data migration to the cloud.
Step-by-step approach:
- Technical evaluation
 - Correct existing errors
 - Pilot
 - Data migration

Proper deployment and increase the efficiency and use of products

Selling points & DEMO

- ✓ Every app that we design can be used by any company, from SMBs up to Enterprise organizations.
- ✓ Every app can be built very fast and shipped with a well-defined CI/CD process.
- ✓ Every app can be easily modified/expanded/integrated as per business needs.
- ✓ Low maintenance required, the only worries are to use the app and pay for licenses.

Some of the apps that we have built

- Advanced Expense Manager
- HR Manager
- Project Management App
- TimeKeeper
- Fleet Manager
- Contract Manager
- Pepas Cloud CRM
- Travel Request
- Store Audit
- Order Business Flow

Guidelines

How to create a request
Simply click the button 'New request' and complete the fields with the inquired information. You are also required to add a destination to your request before you create it so that your manager can review it in order to have it approved.

Reviewing requests
As a manager, your role is to overview your team's activity. Using this app, you have a better look at its requests and the information associated to them. You can review these requests and either approve or reject them by clicking the respective

Managing users and teams
This task falls under the administration role. This is where you add, edit or remove users and teams.
