

PROOF OF VALUE

AI Computer Vision

Are you looking for a computer vision solution for your business? Our team of experts can help you to discover the value of this technology to take your organization to the next level. Our Proof of Value approach offers a low-risk, cost-effective way to test the feasibility and potential of computer vision for your unique business needs.

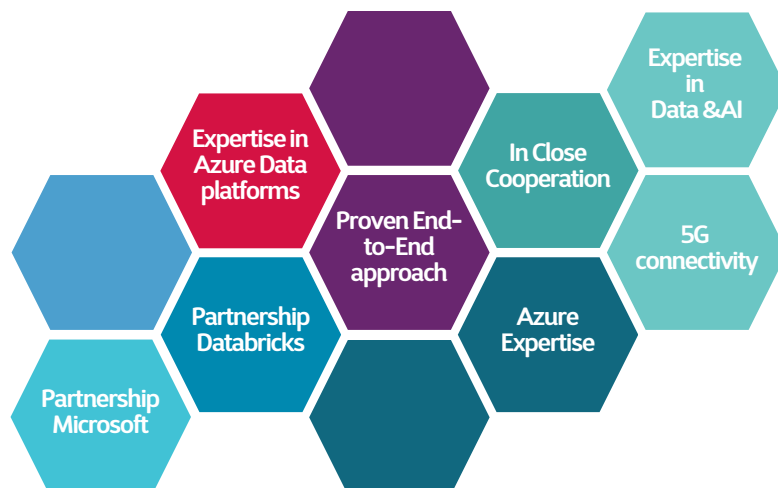

What's in it for your business?

We'll work closely with you to define the scope and requirements of your computer vision need, developing a custom algorithm that is tailored to your specific use case. Whether you need cloud-based or edge device deployment with or without 5G connectivity, we've got you covered.

Our goal? To showcase the remarkable capabilities of computer vision technology and provide a starting point for a full-scale deployment that can revolutionize your business.

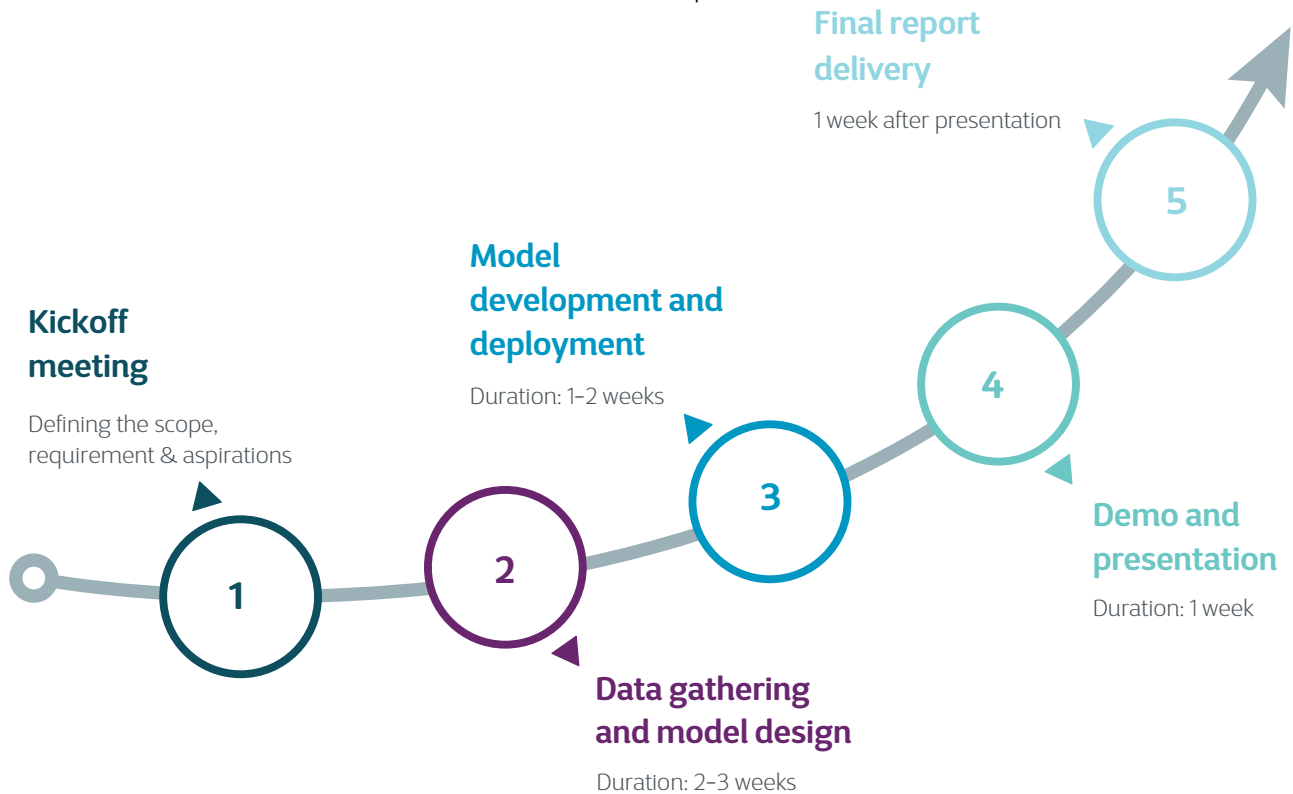

Why Cegeka?

Timeline

Our Proof of Value starts with an AI ideation workshop

Deliverables

Computer vision prototype

Report documenting the design, development, and validation of the computer vision model

Demo of the solution showcasing its capabilities and performance
