

SEAtS Student Engagement Analytics Lead Indicators Dashboard for success & wellbeing

ABOUT STUDENT ENGAGEMENT ANALYTICS:

SEAtS Engagement Analytics allow educators to assess a student's likelihood to succeed using a range of online engagement criteria. Alert behavioural changes and reach out for timely interventions.

See what customers are saying:

"SEAtS have allowed Solent to proceed with their vision of using data to support students, to support future learner analytics and in support of wider retention and achievement aims."

– Caroline Barfoot, Head of Student Experience, Solent University

Key Features:

SEAtS Student Engagement Analytics has allowed clients to see an **11% increase in student achievement/progression** for students who received student support. Grant your faculty the visibility to effectively analyse.

Attendance Online: SEAtS integrates with a range of VLE remote learning and third party solutions.

Single Student Success Score: Track student engagement and wellbeing lead indicators, such as last seen online and LMS activity, submissions and grades. Collate these data points into a Single Student Success Score. The result is a personalised view of engagement, retention and achievement for every student.

Workflows: Create automated workflows that manage student communications based on their student success score. Workflows also escalate students who consistently fall short, flagging students who need help the most.

Data Visualisation: Statistical modelling generates comparative charts for future outcomes in attendance, grades and overall performance.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
