

Microsoft Azure Migration Assessment

Take the First Step in Your Migration Journey

Most business leaders recognize that a move to cloud is no longer a “maybe” but a “must.” But determining which applications and workloads to migrate – and how to do it – can be a challenge.

That’s where Microsoft Azure comes in.

With its wide array of services and ability to provide both the cloud infrastructure and platform, Microsoft Azure is a leader in the space. We can help you define a roadmap to the cloud with Azure by delivering an in-depth identification and analysis of a specific workload or application with Azure cost consumption estimates, reference architecture design, and a migration plan. We will examine a specific scenario, including topics such as:

- App modernization
- Backup and archiving
- Data and analytics
- Dev-test scenarios
- Disaster recovery
- LOB applications
- Microservices
- Serverless computing

What’s Included

- Data analysis on a specific scenario, workload, or set of applications, aligned with key business objectives based on discussions with stakeholders
- Architecture design and migration plan with Azure consumption cost estimates
- A personalized cloud strategy discussion based on real-time data on server and application performance
- Detailed performance reporting to facilitate future data platform modernization plans

Deliverables

We’ll provide insight, analysis, and recommendations for your Azure strategy, including:

- Data-driven findings on the workload/application
- Azure service and architecture recommendations
- Azure cost consumption estimates
- Procurement recommendations
- Decision criteria and time frame
- Migration plan
- Proposal for implementation and migration

Why Perficient

As a Gold-Certified, award-winning Microsoft partner and one of just a handful of National Solution Providers, we are a recognized cloud expert with years of experience helping enterprises make the most out of the Microsoft cloud.

With its wide array of services and ability to provide both the cloud infrastructure and platform, Microsoft Azure is a leader in the space.
