

Azure Data Platform in 30 Days

Make Azure Your Data Platform Foundation

Does your organization struggle with disparate or non-centralized data sources, outdated data platforms, and lack of access to data insights? These issues prevent many companies from turning mountains of data into impactful insights that can improve internal processes and enhance the customer, partner, and stakeholder experience.

Microsoft Azure lets you automate many steps of your data processing, bring it together onto a consolidated platform, and draw insights with Azure's intelligent data services.

Our Azure Data Platform in 30 Days engagement will create a customized Azure data blueprint and set you up for migration to the platform. At the end of this engagement, not only will you have a modern data platform, but improved processes that optimize how you ingest your data and drive insights.

What's Included

- **Design and model processes:** Through a collaborative workshop approach, we create awareness and envision the role of a cloud data and analytics platform utilizing Azure services.
- **Provision landing zone with Azure Data Services:** We help your team create a blueprint to enable the use of Azure data and analytics cloud services now and in the future.
- **Automation enablement:** In addition to leveraging Azure Data Services to support your scenarios, we help you select the automation tooling for your needs.

Deliverables

- Azure landing zone architecture
- Executive summary of engagement scope, customer objectives, results of modernization, and recommended next steps
- Specific use cases or scenarios identified in analysis and design workshop
- Azure architecture design with ADS service recommendations
- Proposal for additional services (e.g. support, data migration, cloud adoption framework engagement, portfolio analysis, etc.)

Why Perficient

Our more than 20 years of data experience across industries gives us a deep understanding of current data trends. We've also partnered with all major cloud vendors. Our dedicated cloud architects understand both the technology implications and cost impacts of the many different cloud options. We can help you choose the one that's right for you.

As a Gold-Certified, award-winning Microsoft partner and one of just a handful of National Solution Providers, we are a recognized cloud expert with years of experience helping enterprises make the most out of the Microsoft cloud.

Our Azure Data Platform in 30 Days engagement will create a customized Azure data blueprint and set you up for migration to the platform.
