

# **PetaBytz Azure Business Continuity & Disaster Recovery**

## What is Azure Site Recovery service?

- Adopting a business continuity and disaster recovery (BCDR) strategy that keeps your data safe, and your apps and workloads online, when planned and unplanned outages occur.

# PetaBytz ASR contribution to BCDR Strategy

**Site Recovery service:** Site Recovery helps ensure business continuity by keeping business apps and workloads running during outages. It replicates workloads running on physical and virtual machines (VMs) from a primary site to a secondary location.

**Backup service:** The Azure Backup service keeps your data safe and recoverable.

## PetaBytz Site Recovery can manage replication for

- Azure VMs replicating between Azure regions
- Replication from Azure Public Multi-Access Edge Compute (MEC) to the region
- Replication between two Azure Public MECs
- On-premises VMs, Azure Stack VMs, and physical servers

# Benefits

---

- Automated replication
- No need of secondary data center
- Only pay for DR VMs
- Ease of Deployment
- Dependable Failover and Recovery.
- Cost Effective.
- Accessibility.
- Meet Compliance.
