Why GreenData?

We're seasoned consultants with deeply specialized knowledge of Business Strategy, Innovation, Human-Centered Design, Operations, and Project Management. Based on our extreme outliar thinking, we create compelling user experiences that are often exceptional in the business world. We deliver solutions based on decades of experience and first principles thinking. **Our customer outcomes are critical to us**; we focus on value in a quarter, deep client partnership and delivering the optimal solution at the most performant cost.

GreenData has a proven record of success helping our customers based on decades of experience and a carefully crafted approach:

- Gain a clear understanding of your current state
- Discuss and prioritize desired outcomes
- Propose and evaluate potential future states for processes and technologies
- Create implementation and training plans
- Deliver early wins and ongoing success

Green Data

Areas of Focus

Project Management Optimization

PPM practice design: increase accountability, align resources, expand productivity

- Establish project management processes and governing structures

- Implement new practice design through training

- Build continuous improvement

Project Tools and Automation: control costs, manage outcomes, increase employee satisfaction

- Assess options and select technologies to meet needs and eliminate challenges

- Design project analytics and reports

Green Data

Business Process Alignment

Business Process Alignment reimagines core business processes to:

- Increase output by eliminating unnecessary steps

- Reduce costs through automation

- Improve quality by reducing errors

- Increase predictability through focused reports

GreenData starts by focusing on outcomes; our approach has led to:

- Enhancing the way our customers do business to better meet their goals

- Facilitating remote decision making between many stakeholders

- Streamlining business activity

- Allowing more time for creative problem solving

- Enabling rapid transition from idea to action

Enterprise Innovation

GreenData is uniquely positioned to bring the agility and creativity of the Silicon Valley startup world and the sophistication and operational skill of the Global 1000 corporate world together.

Low-code solutions represent a huge windfall for Innovation, and GreenData can help you get started:

- **Application Design**

  Finding that magic moment, where you concentrate on the creative work you do each day. Building human-centric design is at the heart of everything we do at GreenData.

- **Low-Code Application Development**

  65% of Enterprise IT departments will build using Low-Code tools by 2024. GreenData can put you out in front with rapid delivery of enterprise low-code applications.

Green Data
