- PACS
- Health Plans
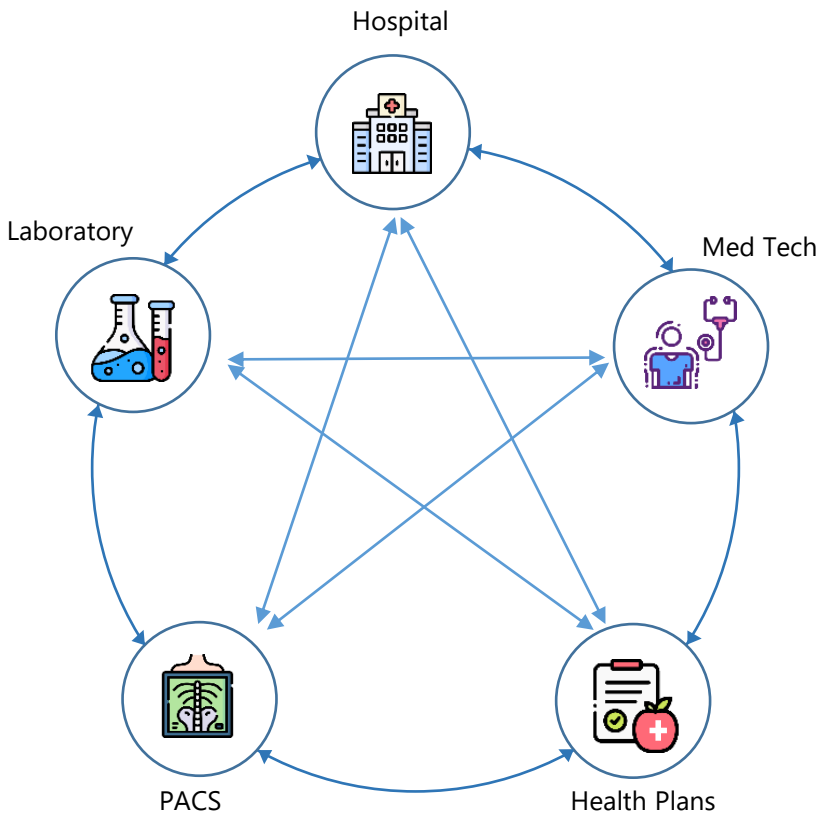

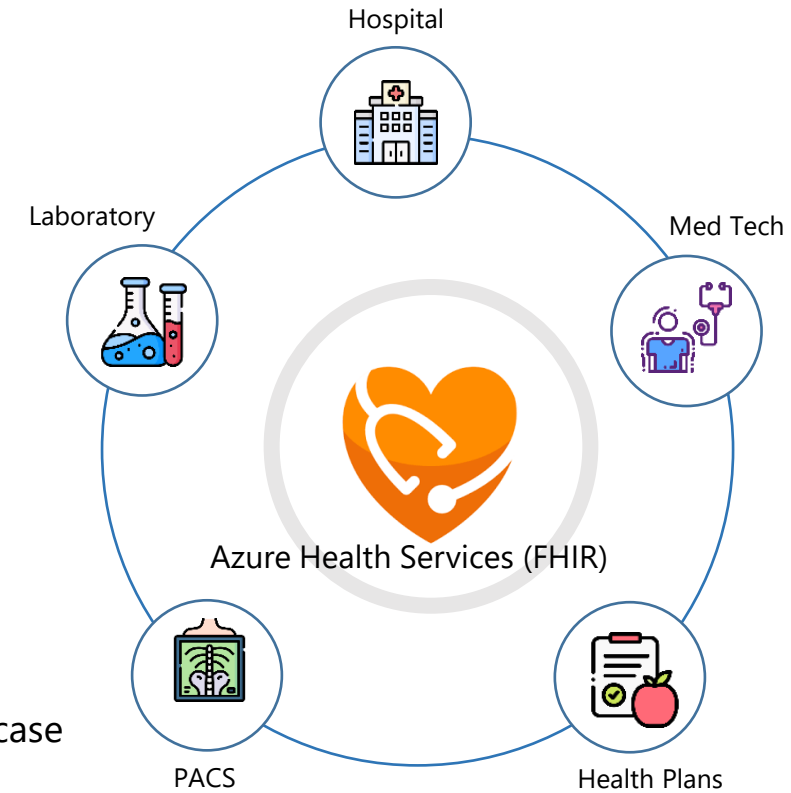

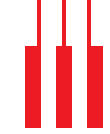

✓ Understand customer ecosystem to spot opportunities around interoperability.

✓ Document the study

✓ Assist to identify use case PoC / Roadmap

✓ Receive an Interoperability Strategy and technology roadmap

✓ Receive consultation on Azure Health Data Services and FHIR

Azure Health Services (FHIR)

- Hospital
- Laboratory
- Med Tech
- PACS
- Health Plans

Healthcare offerings

Consulting with HL7 / FHIR certified specialists and experts with deep industry expertise

Design technology roadmap; Integration, Data Warehousing, visualization implementation

Consulting on Healthcare Digital Transformation

Consulting on Healthcare Data Management leveraging Azure services

Consulting on Revenue Cycle Management, Clinical Trials Optimization, and Patient Engagement

HLS Data Interoperability using FHIR

- Brief:

- We develop a PoC which will show value of data interoperability within your ecosystem leveraging Azure Health Data Services using FHIR standards. The FHIR services in Azure Health Data Services enables rapid exchange of health data using FHIR standards

- Deliverables

- Data Interoperability PoC using FHIR

- Data Interoperability enterprise adoption roadmap

- Cost: 90,000 USD

- Duration: 12 week
