

# Azure Health Check

Have you ever faced challenges like controlling the growing cost and complexity of Azure Subscriptions or ensuring your Azure services are available 24/7? Would you like to have confidence that your Azure environment is healthy? Vigilant.IT's **Azure Health Check** can help you with this.

Leverage the depth of Vigilant.IT's expertise in Azure to identify how to reduce your Azure billing, administration or downtime costs.

What you get:

- Assessment report on your Azure Environment
- Knowledge transfer to help your staff understand the issues
- Identified cost savings in billing, administration or downtime costs.
- Azure certified company with two Azure MVPs on staff

For an additional cost we can also remediate the issues

The **Vigilant.IT Azure Health Check** follows a three stage process:

## **Health Check Assessment**

- Extensive check of your Azure environment from multiple angles
- Data driven and question based
- Prioritised recommendations
- One report that aggregates recommendations from multiple sources

## **Knowledge Transfer**

- Our Azure experts work with your team to identify health issues before they cause problems
- The goal is ongoing health, so we train your team in various tools and techniques to assist this goal

## **Cost Reduction**

- We identify areas that can reduce your Azure bill
- Staff costs are significant, we show you how to reduce your admin costs
- Reduce downtime by ensuring your Azure services are correctly configured

After the health check is complete, we won't leave you high and dry. We will be there to assist you and your team at our standard hourly rates, or we can discuss ongoing assistance packages including our general Managed Services, our Managed Security Services and our pre-paid Professional Services options.

*In the current and ever-changing risk landscape, it pays to ensure you have  
a healthy Azure environment*
