# Microsoft 365: Digital Workforce Workshop

Empower your people to be productive and secure from anywhere

We are building experiences and modern ways to get work done to help everyone thrive in this new world of hybrid work. In the current environment there is a greater need to deploy solutions and services that bring people together in a secure virtual setting. Many organizations have already begun their rapid move to the cloud to achieve secure and flexible work scenarios that enable people to collaborate more effectively than ever before.

Discover the path to application modernization by engaging CompuNet as your guide.

Workshop Highlights

Evaluate your secure work from anywhere options and business implications

The goal is to envision and enable the scenarios that are relevant to you

Two-day workshop leaves you with a concrete deployment plan, timelines, and next actions

Learn how to empower people to be more productive and secure as they adapt to new ways of working with Microsoft 365.

With this two-day workshop, we'll show you how you can use Microsoft technologies to:

- Provide meeting and collaboration experiences to connect teams remotely and onsite.

- Secure your business with technology you can trust.

- Consolidate to one cost-effective solution to simplify IT management and reduce spending.

What to expect

Teamwork and collaboration are fundamental to build resilience for your people, teams, and organization. Our goal is to empower people to be productive and secure as they adapt to new ways of working with Microsoft 365.

We'll work with you to:

- Understand your secure work from anywhere goals and objectives.
- Envision priority scenarios with a customer immersion experience.
- Define existing and desired work from anywhere scenarios.
- Identify potential blockers and challenges.
- Engage in an environmental and workload analysis.
- Provide a list of actionable recommendations to implement hybrid identity, Microsoft Teams, and security.
- Develop a joint action plan based key results, recommendations, and next steps.
- Provide a Microsoft Teams and Security Adoption kit, including end user training, workload introductions, and support resources.

We'll customize the workshop based on your organization's needs

### Engagement set up

Objectives and scenarios

Customer immersion experience

Deployment and adoption planning

Key results, recommendations, and next steps

Key value:

Reduce number & duration of meetings

Online meetings conducted over Teams are reliable and of very high audio-video quality. As a result, employees spend less time addressing setup and call quality issues, and more time interacting.

Improved collaboration and info sharing

With Teams features like coauthoring, integrated file storage, and internal directory, information workers can effectively and efficiently collaborate in real-time.

Reduce switching between apps

Access to third-party and line-of-business apps inside Teams from any device benefits all workers, especially remote workers. This creates better employee cohesion and a common corporate culture across locations.

Reliable partner

CompuNet provides best-in-class Microsoft solutions and support. Rest assured on our experience with licensing, deployments, migrations, security, and planning.
