EdGraph®

Bring It All Together With EdGraph

EdGraph's Data Management and Analytics

Education agencies: integrate all of your siloed data into one universal data hub. Unlock the power of your data with comprehensive analytics, integration, validation, and governance utilities.

WHAT WE OFFER

EdGraph is a Platform-as-a-Service that aggregates data from a variety of disparate systems within a school district. With all data in one place, this allows for comprehensive and custom analytics, validation/governance, and more.

Modular in design, organizations may implement only the functionality that is relevant to their specific needs (*Managed-Ed-Fi-as-a-Service, Analytics, Data Management/Validation, and more*).

The EdGraph Platform allows for powerful integration/interoperability, identity provisioning/SSO, and role-based security - and is built on open data standards such as Ed-Fi, IMS Global, OAuth 2.0, and more.

And with EdGraph's partnership with Microsoft, users can expect flexible, scalable, and reliable hosting.

See what customers are saying:

"…Volusia County Schools supports a student population of nearly 63,000 students and has 90 instructional institutions. The complexity of our operation far exceeds our department's resources, and we are very thankful for the level of support EdWire provides…

WE HIGHLY RECOMMEND EDWIRE, INC."

- Tina Skipper, Asst. Director of Information & Technology Services
Volusia County Schools, Florida

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
