

GET INTEGRATION MASTERY

WE HELP YOU GET TO THE NEXT LEVEL.

BOWDARK INTEGRATION PACK

Every year, the integration landscape becomes increasingly more complex. From hybrid cloud integration challenges to new requirements for IoT and machine learning, it can be hard to know where to begin. That's why we developed our Bowdark Integration Pack to help customers untangle the cords and respond to new and complex integration requests like never before.

The Bowdark Integration Pack provides a focused, standardized approach to modernizing the enterprise integration landscape. Using cloud iPaas solutions like Azure Integration Services and the SAP Integration Suite, we can put the key foundation pieces in place to take your integration services to the next level.

KEY BENEFITS

- Simplify complex integration scenarios
- Securely integrate cloud and on-premise systems
- Make your development team more productive
- Reduce operating costs and TCO
- Integration patterns and best practices for what's next

WHAT'S INCLUDED

Ol LANDSCAPE ASSESSMENT

We examine your as-is and to-be integration landscape to determine the technologies and services you need to get your environment off the ground and scale to meet future demand. Your team will get a fully documented roadmap to cloud iPaaS success.

O2 COST ASSESSMENT

With consumption-based pricing models, iPaaS solutions offer many cost saving opportunities. After analyzing your IT landscape, you get a cost assessment to help you maximize your cloud spend and save money.

03 PILOT PROJECT

Seeing is believing. We take a pair of pre-determined scenarios and show you how to build and test them in your new iPaaS landscape. Use this pilot project as a template to guide future work.

O4 TRAINING

Getting your team up to speed in new technologies is vital to reimagining your integration process. We lead a week of intense up-skilling that leaves your team ready to tackle new challenges head-on.

05 OPERATIONALIZATION

To get the best results, great skills need to match with great processes. We set up procedures for highly scalable infrastructure-as-code, and you get integration patterns to ensure that integration solutions are not only innovative, but maintainable.

O6 ARCHITECTURAL SUPPORT*

Cloud iPaaS is powerful, but it's also vast. Sometimes you just need a light to show the way. You get discretionary support that can range from quick advice to full-blown scenario collaboration.

I cannot say enough about Bowdark's abilities to solve complex integration problems. We have had many challenges with our integration project and they have resolved all of them beyond all our expectations.
