

Enabling Customers' Frontline Workers with Application Jumpstart Demos

- **Problem**

- Frontline workers are an essential part of the workforce. However, much of their essential processes and tasks that they are required to do are run in an outdated and inefficient way.
- Many companies need a way to enable their Frontline Workers with quicker and easier access to creating and reading reports, inspections, information, and more.

- **Solution**

- We worked with a large technology company to create demos of our Application Jumpstart offerings to help them show their customers how they can enable their frontline workers in a more efficient way.

- **Benefits**

- Our demos showcase the power of Microsoft's Power Platform, Teams, and Viva to allow employees to connect, communicate, learn, and grow.
- These demos highlight our Application Jumpstarts that can be utilized in many different industries to improve the Frontline Worker experience.
