

Making a difference for our Client Transformation journey by helping accelerate Windows and SQL Server Migration to Azure

IBM Consulting – Windows & SQL Server Migration to Azure

IBM Consulting is a Trusted Partner for global Azure clients. Across the industries, IBM Consulting differentiates its solutions with our offerings, strong alliance with Microsoft, innovative engagement services and leveraging world's best Azure competencies globally.

How IBM has walked the talk with a Health care client

IBM was chosen by a major health care data company in NA to migrate multiple critical applications/services from their Data Center to Azure Cloud platform. It includes detailed design for application migration to the targeted cloud platform, migration planning, migration build/implementation per the detailed design, migration test planning and test implementation. At the end of application migration detailed design, client will approve the design and schedule and agree to proceed forward with the application build.

WHAT WE OFFER

Our Windows & SQL Server Migration to Azure Offering help our clients accelerate migration & modernization initiatives, reduce technical debt, protect legacy investments, while minimizing business risk and improving business agility by moving their workloads to the cloud faster, cheaper, and more efficiently through a combination of:

- Automation powered by assets such as IBM Cloud Consulting Accelerator
- Augmented by assets from Neudesic and IBM Research
- Dedicated Azure Migration Factory experienced in cloud native migration tools
- Staffed with certified professionals
- Sustainability by design - Target environment is right sized, and our architecture is optimized to reduce energy consumption. Under-utilized application components are either optimized or decommissioned.

IBM Consulting – Windows & SQL Server Migration to Azure

To support your cloud transformation on Azure, we have developed end-to-end solutions for different hybrid cloud journeys for Windows and SQL Server Migration. For example:

- ❑ Migrate Windows Cluster to Azure
- ❑ Migrate Windows apps to Azure (Windows) VM
- ❑ Migrate SQL DB to Azure VM (IaaS)
- ❑ Migrate SQL DB Cluster to Azure VM (IaaS)
- ❑ Migrate SQL to Azure Managed SQL DB

With IBM differentiators (e.g., strong alliance and joint engagement with Microsoft, pre-built solution offerings, IBM Garage Method for Azure, Azure capacity and competencies), we can ensure that your cloud journey will be successful.

Please refer to attached documents for more details. Kindly contact us for further discussion and move forward!

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
