Helped a Government Agency in Hawaii to take its first step towards Cloud Adoption

A Government Agency in Hawaii wanted to do a Proof of Concept (POC) for evaluating Cloud Desktop technology to meet its End User Computing requirements. They wanted to improve the session login time and provide role-based access to the different sets of users. They also wanted the solution to be compatible with the peripheral devices.

The Agency already had an on-premises virtual desktop environment on VMware. Anunta provided POC services to test use cases, application compatibility etc. for Agency's initial 50 users' EUC requirements using Horizon on Azure technology, ensuring improved login speed and secure access to work environment.

At-a-glance:

Customer: A Government Agency in Hawaii

Customer Size: 10,001+ employees

Country: United States

Industry: Government Services

Products and Services: Horizon on Azure

Customer Challenges

The customer is a Government Agency in Hawaii, who were already using VMware Horizon on-premise infrastructure. But due to limitations of the OS and compute costs, the Agency wanted to move away from on-prem VDI to Cloud Desktop environment for initial 50 users.

The started evaluating partners to perform a POC on Cloud Desktop technology with the objective to improve the session login time and enforce role-based access to the two sets of users - General users and Privileged Access Workstation (PAWS) users. They also wanted the solution to be compatible with the peripheral devices, such as printers, scanners.

Partner Solution

Anunta offered its Horizon on Azure POC services that covered the following:

- Discussed and finalized design needs as per customer's use case requirement.

- Completed the Horizon on Azure tenant Onboarding.

- Configured all the technical specifications from the customer's end.

- Created a Horizon on Azure based Cloud Desktop infrastructure and prepared Golden images.

- Integrated applications and peripherals.

- Enabled secure access and performed end to end testing.

Customer Benefits

The customer was highly satisfied with Anunta's services and appreciated the way Horizon on Azure infrastructure was designed conforming to their EUC requirements.

Seamless Integration
Tested the compatibility with applications and peripheral devices, such as printers and scanners.

Improved Login Time
The session login time was improved to 15 seconds for subsequent logins.

Secure Access
Desktops and access were provided to the respective users as per their profiles. Security protocols such as LAPS client and restricted internet access were enabled.
