AzFabric
## Modernise Your Data Platform

Helping your organization modernize your data platform the cost-efficient and secure way

Ensure a sustainable foundation, structure, governance, architecture, and security for your data platform modernization journey.

Modernise your Data platform

Our modern data platform accelerators are carefully crafted to suit a vast majority of our customer scenarios. We act as your trusted advisor and guide you on the journey to data platform adoption/enhancement, ensuring a smooth transition. Our goal is to set our customers up for the data platform of future, in a sustainable manner – so you are migrating and establishing new workloads, and not revisiting technical debt.

AzFabric is right solution for you if:

- You are planning to modernise your Data platform to Microsoft Azure
- You have moved to Microsoft Azure to support tactical / operational needs and now need to ensure the data platform has been planned to cater for exponential growth
- You have concerns around data governance, efficiency, operations, cost control or transparency

Standalone	**Hybrid**	**Enterprise-scale**
Cloud-native baseline for initial workloads and simple deployment model.	Existing Azure deployments looking to introduce stronger governance.	Complex enterprise environment poised for long-term self-sufficiency.

Why consider an Azure Modern Data platform?

- Improved Performance
- Analytics and Insights
- Cost Optimisation
- Immense Scalability and Global footprint
- Enhanced Uptime
- Improved Data Security & Governance
- Transparency and Traceability
- Uniform and compliant IT Infrastructure
