

IOT & DIGITALIZATION WORKSHOP

OPEN YOUR EYES FOR NEW DIGITAL BUSINESS

This workshop will open your eyes to new possibilities where digitalization can be used in your business environment. During the day we go through different solution examples where digitalization has been used in business (Predictive maintenance, logistics, security, production, quality control, etc.).

The topics include:

Morning

- Review of current ICT solutions
- Introduction to IoT solutions
- Data analytics
- Machine Learning & AI
- Power BI dashboards

Afternoon

- Real life use case examples and reference implementations.
- Innovation of your company's digitalization possibilities together with Avanio's senior technical leaders
- Building documented ideas together to be implemented in future.

Welcome!

This 1-day workshop is focused on IoT and digitalization solutions for business leaders. The workshop can be scheduled at a time that suits you, and we will bring it to a location of your choice. The aim of the workshop is to help you discover new business opportunities that can arise from IoT and digitalization.

End of the day we have time to innovate together some ideas that has been identified during the day.
