

# The Learning Platform for Microsoft 365.

LMS365 provides a **complete learning management platform for Microsoft 365, SharePoint, Teams and Viva Learning**, keeping customer content and data in a single, secure platform. The integration with Microsoft Teams lets employees **learn in the flow of work, connect and collaborate** within a shared, streamlined digital workspace, making learning an integrated part of your everyday workflow.

## Access your learning in your existing environment

Employees can access a **personalized learner dashboard** with a full overview of available courses and can sign up for training of their interest. You can even **bring the course catalog right into a channel** as a tab for easier access.

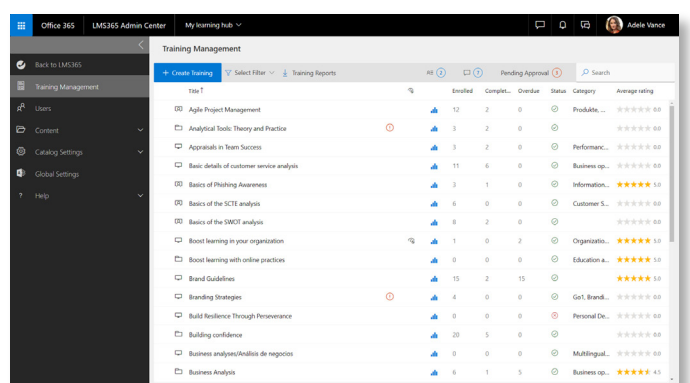

## Create a collaborative learning workspace

**Create specific training channels** where all members can interact, help and learn from each other throughout the learning process. They can **suggest and share courses directly in a chat or channel** using the LMS365 pin or @ sign.

## Create and deliver learning in the flow of work

**Empower subject matter experts to create courses** with the LMS365 Course Creator and use LMS365 Training Plans specifically designed to the individual user's needs. Enable admins to **access all LMS365 learning management tools** within Microsoft Teams.

# Benefits

The LMS365 app for Microsoft Teams enables people to **find, take, manage, and keep track of training without leaving the Microsoft Teams platform**, providing flexible access to training and learning administration tools alongside your favorite tools. The LMS365 integration with Microsoft Teams enables you to:

- 1.** **Create and deliver learning in the flow of work** where learners and admins don't have to leave Microsoft Teams to create, take, track and manage learning.
- 2.** **Give learners more flexibility to train on their own time** and on any device through the desktop or mobile application.
- 3.** **Foster a collaborative learning culture** and promote open knowledge sharing amongst employees during the entire learning process.
- 4.** **Deliver all forms of training** and combine online self-paced learning and classroom training with webinars and blended learning.

## Additional Microsoft Integrations

-  **Viva Learning:** Bring structured, trackable training from LMS365 into Viva Learning, showing courses side by side with other learning content.
-  **SharePoint:** Create a rich, browser-based learning experience through the intranet or a training portal in SharePoint.
-  **Office tools:** Create custom courses and manage content that leverage Microsoft 365 tools such PowerPoint, Word, Stream and more.
-  **Power BI:** Keep track of learners' progress and analyze the effectiveness of your training programs with ready-made Power BI templates.
-  **Power App:** Build low-code apps for LMS365 that optimize processes and solve business challenges.
-  **Power Automate:** Create unique flows to automate the training process or use the pre-built LMS365 connectors.
-  **Azure:** Utilize Azure Active Directory and Microsoft 365 Groups for easy user management.
-  **Dynamics 365:** The OData API allows for easy integration and automation of learner records, certificates and competencies.
