

Reduce cost and downtime of your assets with advanced maintenance capabilities

Special Offer for Manufacturing Industry

Columbus Offer “Reduce cost and downtime of your assets with advanced maintenance capabilities” is a one-day workshop that will help your team to learn:

You don't have to have IT the knowledge to be a part of the Workshop. Understanding your current processes, operational activities & future requirements is the most important thing.

Workshop in details

Introduction to modern asset management

- The business need to improve asset management
- The benefits of connected shop floor equipment

Demonstration

Demo of how Dynamics 365 and associated tools can be used to drive improvements in asset utilization

Understanding your needs

30 min call prior to the workshop to customize it for your business specifics

Modern asset enablement

- Architecture & best practice
- Technology considerations
- Business considerations
- Process considerations

Discussion

- Current assets and connectivity support
- Future roadmap based on your requirements
- Q&A and next steps

Business Use Cases

During the workshop, we will introduce you to the modern asset management approach and demonstrate how it can be enabled based on the actual use cases that manufacturers face on a daily basis.

Connected assets

Merging Operational Technology with Information Technology

Reactive maintenance

(e.g. breakdowns)

Planning for maintenance

- resources & capacity

Preventative & Predictive maintenance

Why invest time and effort?

By 2024 manufacturers will lower operational costs by 30% by combining hyper-automation technologies with redesigned operational processes (Gartner).
