

Citrix on Azure

A Citrix on Azure environment allows you to make the most of the multi-users features of Windows 10, providing a modern and secure desktop, that can be accessed from any place and device, ensuring the best user experience in flexible and innovative business contexts.

Combining high level cross-platform skills and strong know-how on Microsoft and Citrix solutions we help our Customers designing and configuring a cloud environment, creating an integrated, flexible and secure IT infrastructure, using the more suitable technologies available on the market.

Our competences are confirmed by more than 1000 projects on desktop virtualization consultancy, including the design, realization and maintenance of complex virtualized infrastructures as, for example, one with more than 30.000 Virtual Desktop users and hundreds of applications.
