OneData Master- & Metadata tool

ABOUT OneDNA:

From the thorough setup of an 'on-premise' data warehouse to the build and extraction of a Cloud data platform. We are a team of specialists with the goal to support our clients to a data-driven way of working.

WHAT WE OFFER

Maintaining master- and metadata always comes with several challenges regarding security, flexibility and ease of use. Therefore, maintaining your data requires a lot of effort.

By combining a number of best practices, OneDNA has been able to create a light-weight tool to manage your master- and metadata in a flexible, easy to use and secure way on a central location. The cloud based tool provides optimal flexibility in storing your data on any chosen platform (either cloud or on-premise).

The implementation of the Master- and Metadata tool consists of gathering requirements, configuring of storage, installation of the actual tool and implementing access to the tool.

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
