

Modern Data Platform

Our Approach Think Big, Start Small is at the foundation of our approach – we will partner with you to stand up the platform within 4-6 weeks, deliver value early, transferring knowledge and capabilities at a pace that suits you.

Elevate **0**

Vision and Strategy

- Ideation workshop designed to develop strategic vision for driving value from data
- Initial High level business case and total cost of ownership analysis with funding options
- Definition of Minimum Viable Product (MVP) and build of initial Program and Solution Backlog

OFFER AVAILABLE

Activate **1**

Think Big, Start Small

- Creation of Program and Solution Increments for deployment
- Development of Data Pipeline and deployment of Program and Solution Increments and foundation infrastructure services
- Focus on Proof of Value and MVP

Innovate **2**

Continuous Innovation

- Iterative evolution of Program and Solution Backlog working with all stakeholders to develop a Solution Innovation Roadmap
- Deployment of Program and Solution Increments
- Focus on delivering value through transformation

Operate **3**

Support Services

- Full managed, co-managed of self-managed Platform Engineering Service
- Ongoing capacity for change through Data Engineering Services and Continuous Innovation
- Advisory driving Program and Solution Innovation Roadmap

Platform Capabilities

- Data integration
- Data lake
- Data warehousing
- Artificial intelligence
- Machine learning
- Business intelligence

CASE STUDY

University Hospitals Birmingham NHS Foundation Trust

Project director hails benefits of new health data research hub

PIONEER selects Ensono to build a data platform that aims to advance England’s acute care system

“ It is difficult to turn the data that is generated by patient contacts with multiple healthcare services into actionable information to improve the quality of care.

PIONEER aims to change this, providing an **integrated hub for health data research**. Ensono’s technical expertise, and their strong collaborative ethos, has helped us to build a truly technically advanced cloud platform solution, to support the work of PIONEER, while also ensuring that UHB can keep patient data secure

Hilary Fanning, Director of Research Development & Innovation at UHB ”

Microsoft

“ Empower every person and every organization on the planet to achieve more ”

ensono®

“ To be a relentless ally, disrupting the status quo and unleashing our clients to do great things ”
