
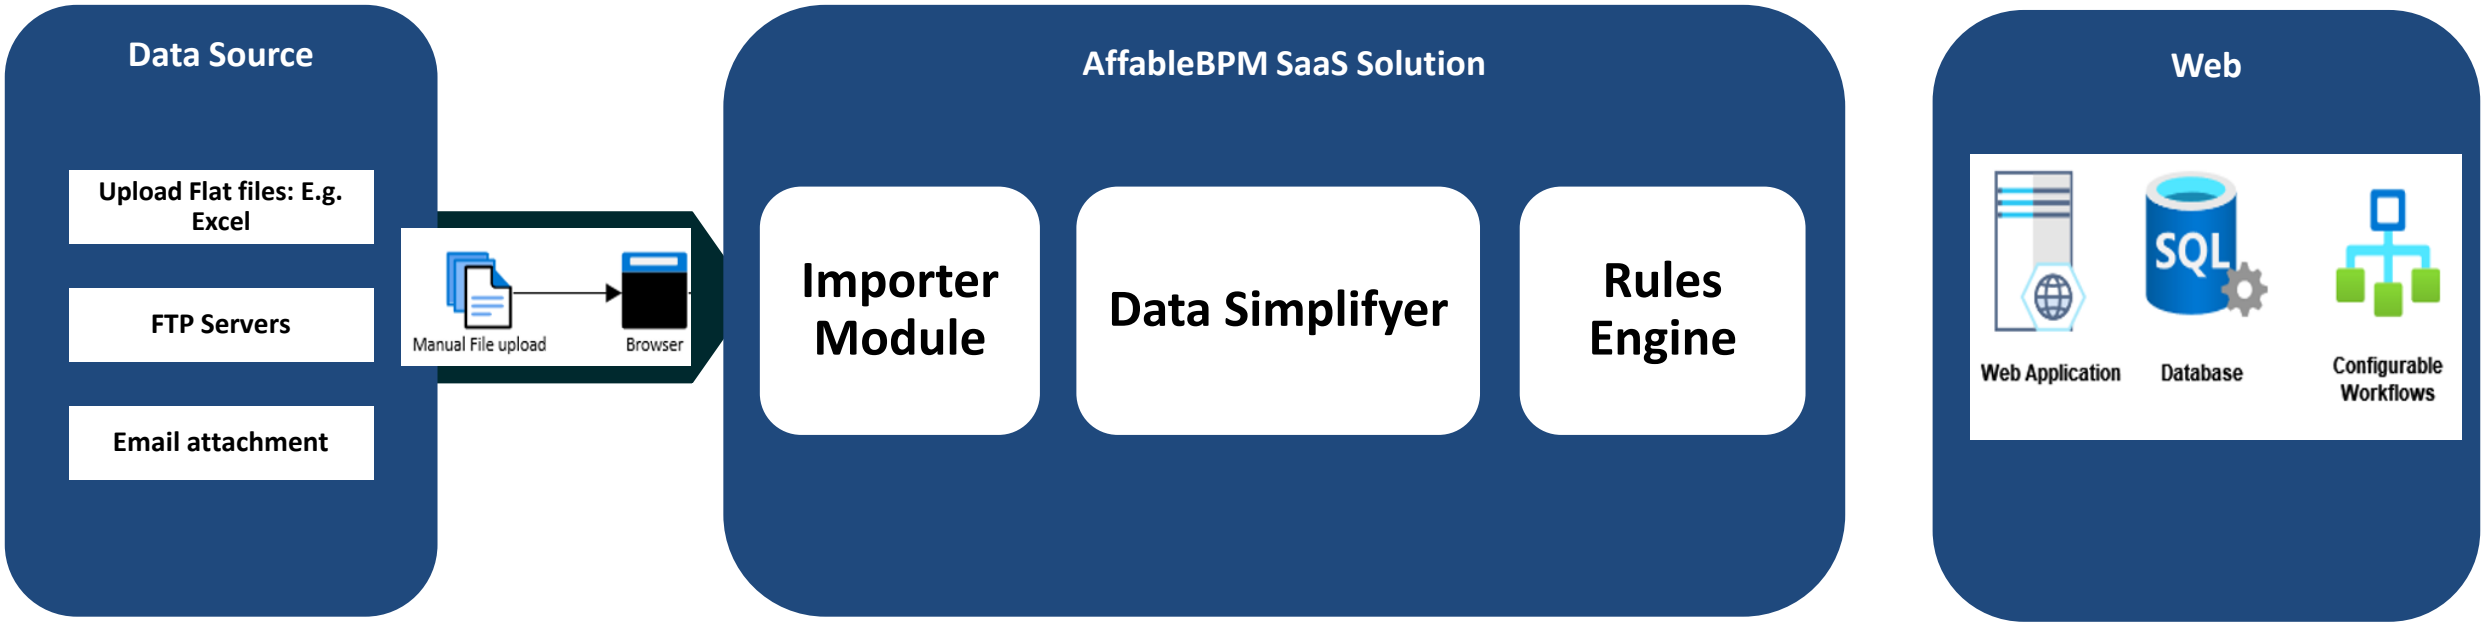
AffableBPM

Data Simplification and EHR Integration

Automation Made Easy!

AffableBPM Data Simplifyer



Data Challenges

Complexity Overload	Versioning Challenges	Error-Prone Manual Workflows	Data Quality Compromises
Unreliable Reporting	Integration and Consolidation	Security and Data Integrity	Maintenance of Core Data

AffableBPM Data Simplifyer Capabilities

Identify Inefficiencies:
- Identify operational inefficiencies within existing processes and systems.

Assess Risks:
- Evaluate the risks associated with the identified inefficiencies.

Recognize the Need for Change:
- Need for digitalization to address the inefficiencies and mitigate risks.

Introduce Data Simplifyer:
- Data Simplifyer as the solution for digital transformation and operational improvement.

Analyze Existing Processes:
- Identify areas for improvement and automation.

Convert to Web:
- Utilize Data Simplifyer's capabilities to convert data to web that replace the outdated processes.

Data Migration:
- Migrate data from legacy systems to the new web applications.

Implement Automation:
- Automate manual tasks and workflows to increase efficiency and reduce errors.

Ensure Data Security:
- Implement robust security measures to protect sensitive data.

Enhance Collaboration:
- Seamless collaboration among teams through the web applications.

Streamline Workflows:
- Streamline and optimize workflows to improve productivity and reduce bottlenecks.

Generate Reports and Insights:
- Utilize Data Simplifyer's reporting and analytics capabilities to generate actionable insights.

Monitor and Improve:
- Continuously monitor the performance of the web applications and identify areas for further improvement.

Training and Adoption: Provide
- Users training for a smooth transition to the new digital processes.

Realize Benefits:
- Experience the benefits of accelerated digitalization, including increased efficiency, improved data quality, and enhanced decision-making.
